NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. Purchase payment by postage stamps *NOT ACCEPTABLE*.

32-56-SM — Amendment to resolution as to additional Wall covering.

Columbus Coated Fabrics Co., Columbus, Ohio, requested that the resolution adopted November 14, 1956 and amended June 30, 1964 under Cal. No. 32-56-SM, be reopened and amended so as to include additional fabrics.

PROPOSED USE: Wall covering.

DESCRIPTION: The requested fabrics are the same as the presently approved fabrics, a woven cotton fabric with a vinyl film bonded to one face. The difference is in the overall thickness. The requested fabrics are known as Knight Guard—0.022" in thickness; Prince Guard—0.0095" in thickness; Queen Guard with Tedlar - 0.0355" in thickness, and Royal Guard with Tedlar - 0.0355" in thickness.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted November 14, 1956 and amended June 30, 1964, under Cal. 32-56-SM, be reopened and amended so as to include the additional fabrics as herein described, on condition that the requirements of the resolution adopted November 14, 1956 and amended June 30, 1964, under Cal. 123-56-SA—Amendment to resolution as to change of model designation.

MINUTES

Suburban Manufacturing Company, Dayton, Tennessee requested that the resolution adopted March 10, 1959 under Calendar Number 123-56-SA be reopened and amended so as to include change of model designation.

PROPOSED USE: Gas-fired heating unit for window or wall installation.

DESCRIPTION: The model designation for the Novent has been changed to N3-20, N3-35 and N3-45, and for the Dynavent, DN3-20, DN3-35, and DN3-45. The number 3 signifies the third time the units have been approved by AGA.

The only difference in these models as compared to the original Novent and Dynavent is that the air intakes for combustion air are relocated on the 35,000 and 45,000 BTU models from the control compartment to the blower housing.

The only change on the N3-20 was relocation of the pilot from a vertical position to a horizontal position.

These units are approved by AGA and listed on page 293 of the July 1965 AGA Directory.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted March 10, 1959 under Calendar Number 123-56-SA be reopened and amended so as to include the change of model designation of Novent models to N3-20, N3-35 and N3-45; and for Dynavent models to DN3-20, DN3-35 and DN3-45, on condition that the requirements of the resolution adopted March 10, 1959 under Calendar Number 123-56-SA, are complied with.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 436-58-SA—Tokheim Corporation, New York, N.Y., requested that the resolution adopted November 18, 1958 and amended through June 29, 1965, under Cal. No. 436-58-SA, be reopened and amended so as to include the additional Tokheim Gasoline Pumps and Dispensers, Models 486-HS and 486-D with or without suffix letters, E, IBM, PEH, PR, TP, WV, RC, KC-4, KC-8, and KC-16.

PROPOSED USE: Gasoline dispensing pump.

DESCRIPTION: The models 486-HS high speed commercial pump is similar to the Model 485 pump previously approved, except that instead of a $\frac{1}{3}$ hp. electric motor and a delivery capacity of 15 gpm., it has a $\frac{3}{4}$ hp. electric motor and a delivery capacity of 22 gpm.

The Model 486-D high speed commercial pump is the same as the previously approved model 486. The D has been added to indicate to the trade that the model has dual pumping units.

The suffix letters E, IBM, PEH, PR, TP, WV, and RC have the same significance as in prior approvals.

The suffixes KC-4, KC-8 and KC-16 are new and indicate that the pump or dispenser is equipped with a KEY CONTROL SYSTEM which can be furnished for operation with 4, 8 or 16 keys.

The model 486-HS and 486-D appliances have been approved by Underwriters' Laboratories, File MH 1895.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted November 18, 1958 and amended through June 29, 1965, under Cal. No. 763-62-SA, be reopened and amended so as to include the additional Tokheim Models 1048A-OSB, 1052-OSB, 1048A-ORCB, and 1052A-ORCB, Fixed Orifice Type Blender Gasoline Dispensing Pumps and Dispensers.

PROPOSED USE: Gasoline dispensing pump.

DESCRIPTION: In the previously approved Models 448-A-SB, 448-A-RC-B, 452-A-SB, and 452-A-RC-B blending of low and high octane gasoline was accomplished by means of gears and change gears are made available to oil companies to change the composition of the blended product in any ratio up to 9 to 1. A seal was provided to prevent unauthorized tampering.

The new models are made with fixed orifice type blending units. These consist of a pressure balancing valve, two small orifice plates and two check valves. These units are available in six blend ratios; 50-50, 55-45, 60-40, 65-35, 70-30, and 75-25. Other ratios, however, can be provided. The orifice unit is sealed against tampering.

The Model 1048A-OSB is similar to the previously approved Model 448-A-SB blender except that it has the orifice unit and a different shape exterior cabinet.

The Model 1052A-OSB is similar to the previously approved Model 452-A-SB except that it has the orifice blender and exterior cabinet of different shape.

The Model 1048-A-ORCB, a remote control island dispenser, is similar to the previously approved 448-A-RC-B except that it has the orifice blender and an exterior cabinet of different shape.

The model 1052A-ORCB, a remote control island dispenser, is similar to the previously approved Model 452-A-RC-B except that it has the orifice blender and an exterior cabinet of different shape.

The new models may have suffixes GP, P, TP-IBM, PEH, PR, SP, TP or WNC, indicating type of panels on the cabinet, ticket printing feature or power reset of computer or type of register.

The Models 1048A-OSB, 1052A-OSB, 1048A-ORCB and 1052A-ORCB have been approved by Underwriters' Laboratories, file MH 1895.

For Applicant: None.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Becker and Commissioner Klein 3

Negative: Commissioner Fox 1

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
586-63-SA—Hotpoint, Division of General Electric Company, Chicago, Illinois owner-manufacturer filed for approval of the appliance known as Hotpoint Portable Automatic Domestic and Commercial Clothes Washers, various models, under the provisions of C26-191.0 and C26-178.0 Administrative Building Code and the Submerged Inlet Rules of the Board.

PROPOSED USE: Clothes Washers.

DESCRIPTION: All Hotpoint Clothes Washers from 1957 to present models use identical drive mechanism called "Co-axial" transmissions, except for minor mechanical improvements. These machines are basically portable equipment of the electrical plug-in type grounded terminal and completely automatic in operation with respect to hot and cold water supply, with water inlet air gap anti siphon systems, similar pump drain and positive termination of electrical cycle. Bodies and spin tubs are all porcelain and identical in all models.

The cabinet dimensions are: Work surface height—36", width—25 $\frac{5}{8}$ ", depth—28"; overall height—40 $\frac{1}{2}$ " to 45 $\frac{3}{4}$ " depending on model. Height dimensions include a $\frac{3}{4}$ " allowance for leveling leg. The weight of the machine is approximately 250 lbs.

Major variations on models are created by the inclusion of additional features over "basic" U.L. tested models such as back trim, single speed motors to two speed, more adequate selection of wash and rinse water temperatures, and

in the LW 385 and LW 395, a pressure filled feature for low pressure water areas instead of the conventional time fill.

All model numbers are prefixed by "LW" to indicate a home laundry washer and by the suffix number 0-1-2-3-or 4 to designate year of manufacture.

Basic model number LW100 is a coin-operated, commercial use washer. This model is essentially equivalent to the domestic type except for the coin-box operation.

The water inlet system consists of the solenoid operated inlet valve, connecting hose, fill nozzle, and rubber moulded inlet horn. The inlet system is mounted to the rear left corner of the cabinet body. The air gap is 4" between the overflow and the water supply inlet horn.

Two types of valves are used on 1963 washers. The single outlet port, is used on all models except Model LW 395. The inlet valve on models except Model LW 395 includes a third solenoid and a second outlet port which regulates the flow of water into the rinse additive and bleach dispenser.

The machine is designed for top loading. The lid is side hinged, and does not obstruct control panel.

The machine operates on 115 volts, 60 cycle a.c. (15 ampere fuse or 20 ampere circuit breaker recommended).

INSPECTION AND TEST: Details of construction were examined by Assistant Architect T. W. Farricker, Jr., and the size and location of the air gap were noted. The washer has been approved by the Underwriters' Laboratories as to the electrical features of the equipment.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Hotpoint Portable Automatic Domestic and Commercial Clothes Washers, Models LW 100, LW 325, LW 330, LW 331, LW 332, LW 333, LW 334, LW 336, LW 337, LW 345, LW 346, LW 349, LW 355, LW 360, LW 361, LW 362, LW 363, LW 364, LW 365, LW 367, LW 375, LW 385, LW 395, LW 400, LW 425, LW 450, LW 470, LW 485, LW 495, LW 451, LW 452, LW 453, LW 454, LW 471, LW 472, LW 473, and LW 474 for use in New York City under the provisions of C26-191.0 and C26-178.0 Administrative Building Code and the Submerged Inlet Rules of the Board. Each appliance shall bear a label or plate, permanently affixed, reading, "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 586-63-SA". The Committee further recommends that when the machines are installed in batteries, the Plumbing Division of the Department of Buildings shall check the requirements as to the size of the waste line.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

829-64-SM—T. T. Toole and Sons for AA Wire Products Co., Chicago, filed for approval of the material known as AA-Lok, under the provisions of C26-430. and C26-431 Administrative Building Code.

PROPOSED USE: To bond withes in hollow wall construction and to be use in lieu of header courses in masonry construction.

DESCRIPTION: The lock or tee consist of three parallel wires of 3/16" diameter with 3/16" diameter cross wires in the form of an "X" wel dto the three side or parallel wires on 16" centers. The cross wires have a "V" drip to prevent passage of moisture. In application, the lock is laid continuously in the horizontal mortar joints.

INSPECTION AND TEST: The applicant has submitted a report of tests conducted by IIT Research Institute (formerly Armour Research Foundation of Illinois Institute of Technology). The report shows that the tee acts as a shear connector between the two withes of a cavity wall and thus increases its potential transverse strength.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as AA-Lok as manufactured by AA Wire Products Co., for use in New York City, on the following conditions: that the material shall be galvanized; that the material may be used as a tee for bonding withes in hollow walls as provided under C26-430.f Administrative Building Code; that the tee or lock be formed with a drip section; that the material may by used in bonding walls of hollow block, tile or structural units as provided under C26-431.0.b Administrative Building Code; that the material may be used in lieu of a header course and that the material is placed not more than 16 inches on centers in a vertical plane.

When used in lieu of headers, the type of construction known as "stacked coursing" shall not be used. All cartons in which the material is marketed shall be labeled "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 829-64-SM".

901-64-SM—Bethlehem Steel Co., Bethlehem, Pa., filed for approval of the material known as Bethlehem Steel Co., ASTM 490 High Strength Steel Bolts under the provision of C26-520. Administrative Building Code.

PROPOSED USE: High strength bolts for fastening and connecting structural steel.

DESCRIPTION: The bolts are manufactured in sizes from 1/2 inch to 4 inch diameter with the bolt dimensions conforming to the requirements of American Standards Association Standards B18.2 for heavy semi-finished hexagon structural bolts and units.

The chemical requirements of the bolts and unts are as follows: Carbon-0.30 to 0.53, Phosphorus-0.040 max., Sulfur-0.40 max.

Local Law 73 of 1963 permits the use of A354 bolts, when approved by the Board, with specified fiber stresses. A study of the ASTM requirements show that the A490 bolts, due to its alloy, have greater strengths than the A354 bolt and therefore higher working stresses have been allocated to the A490 bolts.

INSPECTION AND TEST: The applicant has submitted reports of tests showing that the bolts comply with the requirements of ASTM A-490.

RECOMMENDATION: The Committee on Test recommends the approval of the material known/Bethlehem Steel Co., ASTM 490 High Strength Steel Bolts, sizes 1/2" through 1 1/2", for use in New York City when installed in accordance with the requirements of C26-520.0 Administrative Building Code, and the Department of Buildings Rules Relating to High Strength Bolts as filed with City City Clerk, April 23, 1965, on condition that the stresses on these bolts shall not exceed the stresses as allowed for the A354-BC bolts under C26-368.0c.8 Administrative Building Code and that the marking on the bolts and nuts shall be in accordance with the manufacturers' specification.

All containers or cartons in which the material is marketed shall be labeled: "Approve by the Board of Standards and Appeals for use in New York City under Calendar Number 901-64-SM".

The Committee further recommends that when A490 bolts are substituted for ASTM A325 bolts, the A490 fasteners shall be installed in accordance with the applicable requirements for A325 bolts of Section C26-520.0 of the Administrative Building Code and the Department of Buildings "Rules Relating to High Strength Bolts".

When A490 bolts are substituted for A354 BC bolts the A490 fasteners shall be installed in accordance with the applicable requirements for A354 BC bolts of Section C26-520.0 of the Administrative Building Code and the Department of Buildings, "Rules Relating to High Strength Bolts". except that A490 bolts installed by the turn-of-nut method or the calibrated wrench method (i.e., by torque control) shall have a hardened washer under the element (nut or bolt head) turned in tightening and two hardened washers shall be used with all A490 bolts used to connect material having a specified minimum yield point less than 40,000 p.s.i. In addition, A490 bolts installed in lieu of A354 BC bolts shall be tightened to provide, when all fasteners in the joint are tight, at least the minimum bolt tension shown below for the saze of fastener used.

APPLICANT—National Gypsum Company, owner; J. K. Hovind, agent.

APPEARANCES—

For Applicant: John K. Hovind and Donald K. Busch.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox, Commissioner Becker and Commissioner Klein 4

Negative: 0

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

1111-64-SM—National Gypsum Co., Buffalo, New York, filed for approval of the material known as Gold Bond Fire-Shield (Type X) Gypsum Wallboard, under the provisions of C26-88.0, C26-239.0, C26-240, C26-241.0 and C26-595.0 Administrative Building Code.

PROPOSED USE: Component part of a three-hour fire resistive column protection.

DESCRIPTION: The Type X material used as the protection is the same material as approved by the Board under Cal. No. 439-52-SM.

INSPECTION AND TEST: The Type X material was tested and passed as a component part of a three-hour fire resistive column protection at the Underwriters' Laboratories in accordance with the requirements of C26-593.0, C26-594.0, and C26-599.0 Administrative Building Code. The construction is as follows:

Steel studs, 1 $\frac{5}{8}$ " deep by 1-7/16" wide with $\frac{1}{4}$ " folded flanges in the legs, manufactured of 25 gauge steel, are placed along the four flange edges of the column with the hemmed edges resting against the outside surface of the flange. The first layer of the wallboard is then secured to the studs with 1" self drilling screws spaced 24" on centers. The second layer of wallboard is secured to the studs with 1 $\frac{5}{8}$ " self drilling screws 12" on centers and in addition it was secured by double strands of 18 gauge wire wrapped around the assembly spaced 24" on centers.

The third or outer layer of wallboard is attached to the studs with 2 $\frac{1}{4}$ " self drilling screws, spaced 12" on centers. The corners are protected by 1 $\frac{1}{4}$ " by 1 $\frac{1}{4}$ " corner bead attached to the wallboard with 1 $\frac{3}{4}$ " nails and covered with joint compound.

The construction is in accordance with Dwg. R3501-36 which is on file with and is part of the record.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Gold Bond Fire-Shield (Type X) Gypsum Wallboard as a component part of a three hour fire resistive column protection, on condition that the construction be as herein described and in accordance with Dwg. R3501-36 which is on file with and is part of the record under the following conditions: The Gypsum Wallboard shall be labeled with the calendar number under which it was approved, namely 439-52-SM and that plans filed with the Department of Buildings showing the proposed use of this construction shall be labeled "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 1111-64-SM".

1113-64-SM—Cleveland Cap Screw Co., Cleveland, Ohio, filed for approval of the material known as Cleveland Cap Screw ASTM A490 High Strength Bolts with Suitable Nuts and Washers.

PROPOSED USE: High strength bolts for fastening and connecting structural steel.

DESCRIPTION: The bolts are manufactured in sizes from $\frac{1}{2}$ inch to 4 inch diameter with the bolt dimensions conforming to the requirements of American Standards Association Standards B18.2 for heavy semi-finished hexagon structural bolts and nuts.

The chemical properties of the bolts and nuts are as follows: Carbon—0.30 to 0.53, Phosphorus—0.040 max., Sulfur—0.40 max.

Local Law 73 of 1963 permits the use of A354 bolts, when approved by the Board, with specified fiber stresses. A study of the ASTM requirements show that the A490 bolts, due to its alloy, have greater strengths than the A354 bolt and therefore higher working stresses have been allocated to the A490 bolts.

INSPECTION AND TEST: The applicant has submitted the report of test conducted by Herron Testing Laboratories, Inc., showing that the bolts comply with the requirements of ASTM-A-490.

179-65-SM—Miralon Plastic Fabrics for Fields Plastics and Chemicals Inc., Lodi, New Jersey, filed for approval of the material known as Miralon Building Products Flashing material under the provisions of C26-191.0 Administrative Building Code.

PROPOSED USE: Flashing material.

DESCRIPTION: The flashing is a compound homogenous mass of Poly Vinyl Chloride homo polymers. The sheets range in thickness from 0.010" to 0.063".

INSPECTION AND TEST: The applicant has submitted a report of test conducted by United States Testing Company Inc.

Among the tests conducted were Water Vapor Transmission and Flammability. The water vapor transmission is expressed in grams per 24 hours per square meter. The transmission ranged from 0.51 to 0.11 depending on the thickness. The material is rated as self-extinguishing under the Flammability Test.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Miralon Building Products Flashing as herein described for voluntary use in New York City as a flashing material, on condition that the material be installed in accordance with the manufacturers' specifications. All wrappings in which the material is marketed shall be labeled "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 179-65-SM".

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

342-65-SM—Star Expansion Co., Mountainville, New York, filed for approval of the material known as Star Selfdrill Shield under the provisions of C26-191.0 Administrative Building Code.

PROPOSED USE: Material is to be used as an anchoring device.

MINUTES

DESCRIPTION: The expansion shields are cylindrical in shape, hollow through the center and have light double angle teeth on the cutting end. This end also has four milled slots length wise of shield. The cutting end is ribbed on the outer surface. The other end has internal U. S. Standard machine threads. The shields are made of cold rolled steel bar stock and the plugs of S.A.E. 1010 or 1020 steel.

The chuck end type is installed with a power hammer after the shield has been expanded over the plug the chuck end is snapped off leaving the shield flush with the concrete. The chucks are furnished by the manufacturer.

The flush end type is designed for hand installation only.

The rod hanger type is installed with a power hammer. The chuck end is tapered and the tapered portion is above the surface of the concrete after the shield has been installed.

INSPECTION AND TEST: Samples of the shields were tested in Factory Mutual Laboratories. Results were as follows:

$\frac{3}{8}$ "—4900 lbs; $\frac{1}{2}$ "—9800 lbs; $\frac{5}{8}$ "—9700 lbs; $\frac{3}{4}$ "—13,000 lbs. and $\frac{7}{8}$ "—12,750 lbs. The complete report is on file with and is part of the record.

The material has been approved by Factory Mutual Laboratories.

RECOMMENDATION: On the basis of the tests and the data filed by the applicant, The Committee on Test recommends the approval of the material known as Star Self-drill Shield for voluntary use in stone concrete, in New York City, under the provisions of C26-191.0 under the pertinent sections of the Administrative Building Code, in the same manner as an expansion bolt, wherein expansion bolts are permitted. All cartons in which the material is marketed shall be tagged, stamped or labeled: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 342-65-SM".

The Committee recommends that the loading on the shields shall comply with the following table:

343-65-SM—Star Expansion Co., Mountainville, New York, filed for approval of the material known as Star Slug-in Compounded Anchor under the provisions of C26-191.0 Administrative Building Code.

PROPOSED USE: Anchoring device.

DESCRIPTION: The basis unit of Slug-in consists of an alloy cone, either plain or threaded fitted with a lead expansion shield. The alloy is compounded of zinc, aluminum, copper and magnesium.

The lead sleeve is expanded over the cone to exert radial pressure around the circumference of the hole and the cone is ribbed to grip the lead sleeve and to prevent turning when work is bolted into place.

The anchors are installed in concrete by means of a setting tool and a compressive load.

INSPECTION AND TEST: Samples of three and four units were tested by the United States Testing Co., Inc., in both tension and shear. The results were as follows:

Size	Tension lbs.	Shear lbs.	Failure
$\frac{3}{4}$ "	22,150	19,500 lbs.	Concrete
1"	25,750	21,800	Concrete

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 454-65-SA—Photomation Inc., Mountain View, California, filed for approval of the appliance known as Hazegage Combustion Indicator, Model HGL-55 under the provisions of C26-191.0 Administrative Building Code.

PROPOSED USE: A smoke detector for installation at the flue pipe of heavy oil burning or coal burning boilers.

DESCRIPTION: The Photomation indicator consists of a light source, a photo tube unit and a smoke density indicator.

MINUTES

The light source and photo tube unit are rigidly mounted on 4 inch pipe nipples which are welded or flanged to the smoke passage. Provision is made to allow venting air to enter the pipe nipples by using either a pair of flanges with space adjustment between them or by drilling a series of holes in the two pipes. The air drawn into the pipes keeps smoke particles away from the lens.

The light focus on the photo tube permits current to flow through it to the indicator circuit. The indicator is adjusted so that it reads zero for smokeless or slightly hazy combustion. If excess smoke is formed it will affect the flow of current through the photo tube depending on the smoke concentration. If a smoke concentration equivalent to or exceeding No. 2 Ringelmann is reached and maintained for a 2 minute period, a red signal light flashes on. An audible alarm and other controls can be activated by the addition of a suitable external circuit with relays.

A green signal light is also installed on the indicator and lights up when too much excess air is being used for combustion. The operator can then adjust the burner for proper fuel-air ratio.

The Model HGL-55 unit may be used with a combustion recorder.

INSPECTION and TEST: All data submitted was examined by Assistant Engineer G. F. Sklenarik.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Hazegage Combustion Indicator, Model HGL-55 for use in New York City for heavy fuel oil burning and coal burning heating plants when installed to the satisfaction of the Department of Air Pollution Control. The installation shall not interfere with the operation of the safety controls on the burner when connected to a burner shut off or in any way with the draft or passage of flue gases through the heating apparatus. The Committee further recommends that each installation bear a label, permanently affixed reading "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 454-65-SA".

visions of the Exterior Veneering Rules and C26-243.0, Administrative Building Code.

PROPOSED USE: Exterior veneer and siding on Class V Buildings.

DESCRIPTION: The material is the same as that approved under Cal. No. 581-53-SM for United States Plywood Corp., and known as Glasweld. The only difference in the requested material and the presently approved material is that the requested material is finished with sculptural configuration. The material is basically an asbestos surfaced calcium silicate. The finish on the panels are either Clear Waterproof, Pigmented Waterproof or a Cementitious Coating. The standard thickness of the material is $\frac{1}{4}$ " and weight 2 lbs/sq. ft. for the $\frac{1}{4}$ " thick material. The thickness, however, may be increased to 1" with a corresponding weight increase.

INSPECTION and TEST: A sample of the material was inspected by Assistant Engineer J. A. Darts and it was noted that the material meets the requirements of an incombustible material under C26-88.0, Administrative Building Code.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Facad as manufactured by United States Plywood Corp., for voluntary use in New York City as an exterior veneering material when attached in accordance with the veneering rules of the board and with the manufacturer's recommendation as shown in System A, which is on file with and is part of the record and also for use as a wall on Class V Building under C26-243.0, Administrative Building Code. NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. Purchase payment by postage stamps **NOT ACCEPTABLE**.

820-57-SM—Amendment to resolution as to additional sections of roof deck and change of corporate name.

Cyclops Corp., Bowman Building Products Division, New York City, requested that the resolution adopted September 20, 1960 and amended January 30, 1962, under Cal. No. 820-57-SM, be reopened and amended so as to include additional roof deck and to show a change of corporate name.

PROPOSED USE: Incombustible roof deck.

DESCRIPTION: The requested deck known as Type A is manufactured in steel sheets 24 inches wide by 1½ inches deep having the following properties:

Gauge	Sections Modulus Inches ³	Moment of Inertia Inches ⁴
18	0.174	0.197
20	0.134	0.151

USE: Container for premix Pepsi-Cola.

DESCRIPTION: The requested Models are basically similar to the previously approved Models RA-25253, RA-25252, RA-25491, and RA-25799, except as follows:

RA-26694—Same as RA-25491 except rubber base molded to stainless steel bottom. Has Firestone instead of Hausen fittings.

RA-26731—Same as RA-26694 except with stacking handle.

RA-26695—Same as RA-26694 except without pressure relief valve, but provide with a frangible device.

RA-26732—Same as RA-26731 except without pressure relief valve, but provided with a frangible device.

RA-25853—Same as RA-25799 except height reduced to give a capacity of five instead of ten gallons.

RA-25979—Same as RA-25853 except without pressure relief valve, but provided with a frangible device.

RA-26656—Five Gallon Type R Product Container with relief device in cover.

RA-26661—Five Gallon Type Fountain Syrup Container.

The above model numbers, with the exception of RA-26656 and RA-26661, are similar to the previously approved models RA-25491 and RA-25799.

The models RA-26656 and RA-26661 cover 9" dia. stainless steel premix containers with .042" top domes and the sidewalls and bottoms are made from .036" material. They also have molded on rubber top and bottom skirts.

47-58-SA—Amendment to resolution so as to include rede-
signation of model number.

The Williamson Co., owner, Cincinnati, Ohio, requested
that the resolution adopted June 23, 1959, under Calendar
Number 47-58-SA, be reopened and amended so as to in-
clude redesignation of model numbers.

PROPOSED USE: Gas-fired warm air furnace for domes-
tic use.

DESCRIPTION: The Williamson Special Series gas
counter-flow Models, 1500 Series is now discontinued and
the Temp-O-Matic gas counter-flow models, 1100 Series
and 1200 Series are replacing them.

The 1100 Series and 1200 Series are similar to the 1500
Series, with the exception of a modification of the heat
exchanger and the use of steel in place of a cast iron gas
burner.

The 1100 Series furnaces are all belt drive forced air
furnaces. The 1200 Series furnaces are similar to the 1100

497-58-SM—Amendment to resolution as to additional ad-
mixture.

Sonneborn Building Products, Inc., New York City, re-
quested that the resolution adopted July 7, 1959 and amended
through April 18, 1961, under Cal. No. 497-58-SM, be re-
opened and amended so as to include an additional admix-
ture.

PROPOSED USE: Admixture for use in concrete.

DESCRIPTION: The requested material Sonotard 6050,
is identical in composition to the presently approved Sono-
tard Liquid, but contains a greater percentage of active
ingredients in order to produce a greater retardation. The
dosage for both products: Sonotard 6050 and Sonotard
Liquid is the same, namely from 2 to 4 ozs. per sack of
cement depending on the temperature.

INSPECTION AND TEST: The applicant has submitted
reports of tests conducted by Gulick-Henderson of New
Jersey, Inc. The tests were comparative tests on concrete
made with and without the admixture. The concrete made
with the admixture showed greater strengths. The report
is on file with and is part of the record.

RECOMMENDATION: The Committee on Test recom-

PROPOSED USE: Flashing material.

DESCRIPTION: The copper used in the flashing ranges from 1 to 7 ozs. The material is known as the following types:

Sandell Duoweld: A core of sheet copper fused on both sides by a hot asphaltic process to layers of fiberglass cloth, forming a single sheet.

Sandell Copper Fabric: A core of sheet copper, coated both sides with asphalt mastic bonded—under pressure, between two layers of asphalt-saturated woven cotton fabric into a single sheet.

Sandell Copper Kraft: A core of sheet copper, asphalt bonded on one side to a heavy weight waterproofed kraft paper.

Sandell Copper Kraft Duplex: A core of sheet copper bonded on both sides to heavyweight, waterproofing asphaltic compound.

Sandell Coated Copper: A core of sheet copper coated on both sides with an asphalt compound.

INSPECTION and TEST: Samples of the flashing were examined by Assistant Engineer J. A. Darts.

RECOMMENDATION: The Committee on Test recommends the approval of the flashing material as herein described and as manufactured by Sandell Mfg. Co. 1309-64-SM—Erico Products, Inc., Cleveland, Ohio, filed for approval of the material known as Caddy Gat Twist Clip, various models, for voluntary use in New York City under the provisions of C26-191.0 of the Administrative Building Code.

PROPOSED USE: To provide method for mounting Electrical Fixtures to exposed main acoustical tee bars.

DESCRIPTION: The Caddy Gat Twist Clip is fabricated from 20 gauge spring steel 2 inches long by 1 inch wide with a 1/4 inch threaded stud in various lengths inserted through the center opening of the clip. A secure locking action on the main acoustical tee bar is developed by the procedure of exerting a slight upward pressure on the clip to engage the large flanges over the 2 opposite sides of a tee bar and then twisting in a clockwise direction until the smaller flanges snag over the edges of the bar.

INSPECTION and TEST: The applicant has submitted tests reports of Pittsburgh Testing showing that failure occurred, under load, at an average of 539 pounds.

RECOMMENDATION: On the basis of the data, tests and samples submitted, the Committee on Test recommends the approval of the material known Caddy Gat Twist Clip as a means of attaching electrical fixture to an exposed main acoustical tee bar provided the load does not exceed 100 pounds per clip. of materials known as Caddy Gat Kon and Caddy Gat Low Voltage clips, for voluntary use in New York City under the provisions of C26-191.0 Administrative Building Code.

PROPOSED USE: The Caddy Gat Kon Clip, to provide a method for supporting conduit from No. 8 wire and 1/4 inch rods and steel flanges. The Caddy Gat Low Voltage Clips are designed to accommodate drive rings, threaded and unthreaded bridle rings, and 1/4 inch-20 screws when fastened to No. 8 wire or 1/4" rod.

DESCRIPTION: The Caddy Gat Kon Clip is made from 20 gauge spring steel in lengths from 3 9/16 inches to 4 5/16 inches long by 1 inch wide. Application of finger pressure to the outer tabs of the clip enables the conduit to be easily positioned on the supporting surface and then securely locked in this position by releasing pressure on the tabs. The Caddy Gat Low Voltage Clips are fabricated from the same type of material. A secure locking action on 1/4 plain rod and No. 8 wire is developed by inserting the appropriate opening at the top portion of the clip onto the 1/4 inch rod or No. 8 wire and then pushing up on the lower portion of the clip to insert its corresponding lower opening on the No. 8 wire or 1/4" rod.

INSPECTION and TEST: The applicant has submitted test reports of Pittsburgh Testing Lab showing that failure occurred, under load, as follows:

Catalog No.	Clip Application	Test Load
Kon Clip	Clipped to a steel flange	921# Average
Kon Clip	Clipper to #8 wire	962# Average
Kon Clip	Clipped to 1/4 rod	483# Average

1311-64-SM—Erico Products, Inc., Cleveland, Ohio, filed for approval of the materials known as Caddy Gat Combination Conduit Hanger, Caddy Gat Conduit Bracket and Caddy Gat Conduit Clip for voluntary use in New York City under the provision of C26-191.0 of the Administrative Building Code.

PROPOSED USE: To provide method for suspending a conduit box or conduit flush to the underside or outside of steel flanges from $\frac{1}{8}$ inch to $\frac{1}{2}$ inch thick.

DESCRIPTION: The Caddy Gat clips are fabricated from a high carbon spring steel. They can be used separately or in combination for the suspension of conduit or conduit boxes to steel flanges. The Caddy Gat Conduit bracket develops a tight rigid connection, when the bracket is hammered into position, through the special steel tabs in the bracket which cuts into the metal being engaged. A $\frac{1}{4}$ inch thread impression on the bottom and face of the clip provide a secure method of attachment for the box or conduit clip. The Caddy Gat Conduit Clip has $\frac{1}{4}$ inch - 20 thread impression for attachment to the conduit bracket. This clip is also provided with grounding burrs on the inside faces to insure static grounding of conduit. The conduit is locked into position by squeezing the lower portion of the clip with pliers until a special self locking tab on one side of the clip engages a triangular shaped hole on the other side of the clip. The Caddy Gat Combination Conduit Hanger is developed by fastening the Conduit Bracket and Conduit Clip by means of a standard $\frac{1}{4}$ inch - 20 threaded bolt or rivet which results in a 360° area of flexibility for the conduit. When the Conduit Bracket is used in conjunction with the Combination Conduit Hanger, the conduit run lines up with the knock outs in the outlet box and eliminates offsets and bends.

INSPECTION and TEST: The applicant has submitted test reports of Pittsburgh Testing Laboratories showing that failure occurred, under load, as follows:

Catalog Type	Tensile Test Load
Conduit Bracket	481.6# average
Conduit Clip	586# average
Combination Conduit Bracket	294.8 average

RECOMMENDATION: On the basis of the data, tests and samples submitted, the Committee on Test recommends the approval of the materials known as Caddy Gat Conduit Bracket, Caddy Gat Conduit Clip and Caddy Gat Combination Conduit Bracket, in accordance with this report, provided that the loads per clip do not exceed 100# on the Caddy Gat Conduit Bracket or Caddy Gat Conduit Clip and 75# on the Caddy Gat Combination Conduit Bracket. PROPOSED USE: To provide method for suspending No. 8 wire, $\frac{1}{4}$ inch and $\frac{3}{8}$ inch plain rod or $\frac{1}{4}$ inch and $\frac{3}{8}$ inch threaded rod from flange of various thickness.

DESCRIPTION: The Caddy Gat Clips are fabricated from a high carbon spring steel. They can be used separately or with attachments for the suspension of No. 8 wire, plain rod, threaded rod and bolt on assemblies. The projecting tabs in the upper portion of the clip grips into the metal being engaged in such a way as to form a positive locking action. THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
76-65-SM—Dierks Forests Inc., Hot Springs, Arkansas, filed for approval of the materials known as Dierks Nail-Base and Dierks Rigid Sheathing under the provisions of the Fiber board Rules of the Board.

PROPOSED USE: Exterior Sheathing on wood frame construction.

DESCRIPTION: The Nail-Base Sheathing is a ½ inch thick high density board and is designed for the direct attachment of exterior siding such as wood or asbestos shingles. The board is homogeneous product composed of wood fibers treated with asphalt. The sheathing can be supplied either with or without an additional asphalt coating. The width of the board is 4'-0" and is supplied in square edges only.

The Rigid Intermediating Sheathing is a medium density board ½" thick that is similar to the Nail-Base Sheathing except that it is not designed for the direct attachment of exterior siding.

INSPECTION and TEST: The applicant has submitted reports of tests conducted by Pittsburgh Testing Laboratories on both boards. The racking load on the Rigid Sheathing was 6400 lbs. and 9300 on the Nail-Base Sheathing.

RECOMMENDATION: The Committee on Test recommends the approval of the materials known as Dierks Nail-Base and Dierks Rigid Sheathing for use in New York City, as a sheathing material under the provisions of C26-538.0 Administrative Building Code and the Fiber board Rules of the Board on condition that the sheathing shall be applied with 11 gauge 1½ inch long galvanized roofing nails spaced, 3 inches on centers around the perimeter of each board and 6 inches on centers at the intermediate framing studs. All wrappers in which the material is marketed shall be labeled: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 76-55-SM."

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. Purchase payment by postage stamps *NOT ACCEPTABLE*.

COURT DECISIONS.

Matter of Campagno vs. Foley:—On December 18, 1964, petitioner sought a judgment under Article 78 CPLR to annul a decision of the Board on November 10, 1964 which granted an application for the reversal of a decision of the Borough Superintendent; Calendar Number 814-64-A; Premises 9-11 Park Avenue, east side, 48 feet, 1 inch north of East 34th Street, Block 890, Lot 3-4, Borough of Manhattan.

At Supreme Court, Special Term, Part I, Mr. Justice Lupiano rendered the following decision:

"Motion for leave to intervene and for other relief is granted without opposition. Settle order."

(N. Y. L. J. September 3, 1965, page 14).

Matter of Advertising Club of New York, Inc. vs. Foley:—

At Supreme Court, Special Term, Part I, Mr. Justice Murphy ruled as follows:

"The respondent herein having fully considered the questions involved and having applied the relevant zoning regulations to the presented facts determined that the application should be granted. In light of their expertise with respect to the intent and purposes of the Zoning Resolutions, this determination appears to have a rational and legal basis.

Accordingly the cross-motion to vacate order of certiorari is granted and the petition is dismissed. Settle order."

(N. Y. Law Journal, January 17, 1966, page 15).

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

855-65-SM—J. Platzker for Goodman Cinder Block Plant, Inc., Honesdale, Penna., filed for approval of the material known as Silver Streak Crete Chase Block under the provisions of C26-450.0, Administrative Building Code.

PROPOSED USE: Masonry unit to provide a chase.

DESCRIPTION: The block is formed in the shape of a channel. The dimensions are 4 inches deep by 9 inches wide by 16 or 18 inches high. The shell thickness for the 18 inch high unit are 2 inches throughout, and 2½ inches on the outstanding legs and 1¾ inches on the upright leg of the 16 inch high unit.

The blocks are manufactured of the same design mix as the regular cinder blocks approved for the same manufacturer under Cal. 318-60-SM, namely 1:9 with 6½ gallons per sack of cement.

INSPECTION AND TEST: Samples of both sizes were tested by Construction Testing Corp., New Rochelle, New York. The blocks successfully met the requirements of load bearing hollow masonry units. The reports are on file with and are part of the record.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Silver Streak Crete Chase Block for voluntary use in New York City under the provisions of C26-450.0, Administrative Building Code, on condition that all bills of lading, invoices and bills of materials covering this material shall be marked: "Approved by the Board of Standards and Appeals for use in New York City under Cal. 855-65-SM".

"Commission Judah Gribetz (dated 9/22/65)

It is asked in the attached letter that the permit to alter the existing thirty-three story building to a one-story building, as approved under Alteration Application 505/65, be revoked. Report was required in your letter of September 20, 1965.

The proposed alteration, as shown on plans filed with this department under the above noted alteration application, will be in compliance with applicable laws. The application has been *approved* and a *permit to proceed* was issued on April 2, 1965. Since the proposed work would be lawful, there is no reason to *revoke the permit*.

The entire building is vacant, except for the first story which is to remain. Requirements of the department for discontinuance of water supply and electric current apply only to building that are completely *vacant and that are to be completely demolished*. Matters such as leases and other agreements between the tenants and owners do not come within the jurisdiction of this department.

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded mail. COURT DECISIONS.

Matter of Isenburger v. Foley:—On March 2, 1965, the Board granted under Section 11-324 of the Zoning Resolution for minor development, the extension of time to complete construction to December 15, 1965 Calendar Number 316-63-BZY—Vol. II, Premises 208-14 Central Park South, Block 1030, Lots 39, 40, 51 and 42, Borough of Manhattan.

At Supreme Court, Special Term, Part I, Mr. Justice Chimera rendered the following decision:

"This is a proceeding pursuant to Article 78 of the CPLR brought by certain statutory tenants individually and in a representative capacity wherein they seek review of a determination of the Board of Standards and Appeals which granted their landlord an extension of time for the construction of a multiple dwelling to replace the existing premises..... Petitioners lack standing to sue either in representative or individual capacities, and accordingly the petition must be dismissed ——— Accordingly, petitioners' applications is denied, the intervenor-respondent's cross-motion is granted and the petition is dismissed."

(N.Y. Law Journal, May 24, 1965, page 16)

The First Judicial Department, Appellate Division, By Rabin, J. P.; Valente, Stevens, Steuer and Witmer, JJ. in Proceeding 9274, Matter of Isenburger, pet-ap. (Foley, res.-res.) rendered the following decision:

"Order and judgment unanimously affirmed with \$50 costs to intervenor-respondent respondent. No opinion. Order filed"

(N.Y. Law Journal, October 15, 1965, page 16).

The First Judicial Department, Appellate Division, By Rabin, J.P.; Valente, Stevens, and Witmer, JJ. denied the motion for leave to appeal to the Court of Appeals with \$10 costs. Order filed.

(N.Y. Law Journal, November 19, 1965, page 15).

The Court of Appeals ruled as follows:

"4. Matter of Isenburger, ap (Foley, res.)—Motion for leave to appeal denied with \$10 costs and necessary printing disbursements."

(N.Y. Law Journal, January 17, 1966, page 15).

Absent: Chairman Foley 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

171-65-SM—Universal Atlas Cement Division, United States Steel Corporation, owner, requested that the resolution adopted June 15, 1965, under Calendar Number 171-65-SM, be reopened and amended to include Type I Portland Cement, manufactured at their plant located at Freeport, Grand Bahama Island. A cement used as a combination Type I—Type II, and manufactured at this plant was approved for use in New York City by resolution adopted June 15, 1965, under Calendar Number 171-65-SM.

A Committee on Test consisting of Director William A. Nolan and Civil Engineer James B. Anderson, Jr., visited the plant at Freeport, Grand Bahama Island. The applicant has submitted test reports showing that the cement complied with ASTM requirements for Type I cement.

RECOMMENDATION: On the basis of the inspection and data filed by the applicant, the Committee on Test recommends reopening and amending resolution adopted June 15, 1965, under Calendar Number 171-65-SM, to include the approval of the material known as Atlas Portland Cement Type I, for use in New York City under the provisions of Section C26-312 of the Administrative Building Code.

The owner shall submit monthly for a period of six months from the date of this resolution, and annually thereafter, a certified copy of plant laboratory reports certifying that all cement manufactured at the applicant's plant and shipped into New York City, complied with all the requirements of this resolution and including ASTM C150-63 specification.

The Committee on Test further recommends that all bulk shipment of the cement shall be adequately protected during shipment so as to preclude the possibility of any moisture entering into the spaces in which the cement is stored, and all ocean bills of lading shall be stamped: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 171-65-SM".

(Sgd.) WILLIAM A. NOLAN,
Director,

JOHN A. DARTS,
Asst. Engr.

GEORGE F. SKLENARIK,

Committee on Test.

Resolved that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

Negative: 0
Absent: Chairman Foley 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
200-65-SM—Shahmoon Industries, Inc., owner, New York,
New York, filed for approval of the material known as
Shahmoon Industries Buildings Blocks (cinder, stone con-
crete blocks and concrete brick) various sizes for use in
New York City under the provisions of C26-306.0 and C26-
309.0 Administrative Building Code and Masonry Rules of
the Board.

PROPOSED USE: Load bearing concrete brick, cinder
and concrete blocks used in masonry construction.

DESCRIPTION: These load bearing hollow and solid
blocks are made in various sizes, of two types of materials,
namely cinder, 8x16x8, 8x18x8, 12x18x8; concrete block
8x18x8, 12x18x8, 8x16x8, 12x16x8, 4x16x8; concrete brick
8x4x2½.

The processed raw material at the quarry is placed in a
receiving hopper by use of dump trucks or a Michigan
front end loader and conveyed on a covered conveyor belt
to three storage bins. The fourth compartment in the bin
system is filled by air slide type trucks with bulk cement.

The aggregates are drawn from the bins into a traveling
batch hopper on live rail beam type scale system. The water
ratio is controlled by a moisture meter which determines the
correct proportion of water for mix by volume.

The mix data is as follows:

Mix design for concrete block and concrete brick:

- 1000 lbs. (41.66%) ¾" crushed stone.
- 1200 lbs. (50%) concrete sand.
- 200 lbs. (8.34%) hi early cement.

Water-

Mix design for cinder block:

- 500 lbs. (18.73%) ¾" crushed stone.
- 600 lbs. (22.47%) concrete (mfgd) sand.
- 1,350 lbs. (50.56%) cinders.
- 220 lbs. (8.24%) or hi early cement.

The batch is then dumped into a paddle type mixer. From
mixer, batch is dumped into block machine hopper, then
into mold for forming a specific block.

Pallets of freshly formed block, placed on curing racks,
which are suspended on a monorail system, move block
through a four-pass curing oven, on a continual cycle to
point of unloading of block or brick. Live saturated steam
is used for curing.

The unloading conveyor carries (sound) cured units to
a (pace fully automatic) cuber where blocks are stripped
from pallet and deposited in curing machine where all
standard sizes and types of cube of block are formed by
inserting proper type in control system.

Finished cubes of block are removed automatically via flat
cars to pick-up point outside of building. Fork-lift trucks
then move block to yard storage.

THE RESOLUTION—

WHEREAS, the decision of the Fire Commissioner, dated June 17, 1965, reads:

“This will acknowledge your request of June 16, 1965 regarding installation and use of a tank for the storage of liquefied natural gas. The capacity is to be 175,000 barrels.

Please be advised that the Fire Department cannot approve this installation at this time for the reason that it could be in violation of the following provisions of Article 17 of Chapter C-19 of the Administrative Code.

1. C-19.91.0-d requires that the container shall be approved by the Interstate Commerce Commission or the Fire Commissioner. Since 1938 such containers are approved by the Board of Standards and Appeals.

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. Purchase payment by postage stamps *NOT ACCEPTABLE*.

COURT DECISION.

Matter of Dougherty vs. Foley:—On July 7, 1964, under Calendar Number 368-64-BZ the Board granted a variance under Section 72-21 of the Zoning Resolution and Section 666, Subdivision 7 of the New York City Charter, to permit in an R3-2 district, the change in occupancy of a one story building presently under construction from a retail store to an automotive service establishment for the installation of mufflers, tail pipes, seat covers, tires and shock absorbers; also on July 14, 1964 under Calendar Number 3767-63-BZY, extending the time to complete construction to December 15, 1965; Premises 2397 Hylan Boulevard, northwest corner of Burbank Avenue, Block 3646, Lot 1, New Dorp, Borough of Richmond.

At Supreme Court, Mr. Justice Costantino rendered the following decision:

1. It is the opinion of the court that the papers submitted on this application by petitioners Dougherty to review and correct the determination of the respondents do not establish any basis for changing said determination. Further the court finds that the acts of the respondents were neither arbitrary nor capricious. Accordingly, petitioners' application is denied.
2. Petitioners' application to transfer the proceeding to the Appellate Division is also denied.
3. Respondents' application to dismiss the petition is granted.
4. Cross-motion by respondent, and motion by intervenor respondent, to strike reply are both granted. Settle order on notice."

(N.Y. Law Journal, September 23, 1965, page 17).

The Appellate Division, Second Judicial Department, By Beldock, P. J.; Christ, Brennan, Rabin and Hopkins, JJ. ruled as follows: "Motion by appellants to dispense with printing granted. The appeal will be heard on the original papers and on appellants' typewritten brief. The brief shall comply with the rules of this court. The appellants are directed to file six copies of their typewritten brief and to serve one copy on each of the respondents."

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 699-63-SM—Frankel Associates, Inc., New York, New York, filed for approval of the material known as Seal-Tex (a curtain and drapery material) under the provisions of the Flameproofing Rules of the Board.

PROPOSED USE: As curtain and drapery material in places of public assembly.

DESCRIPTION: Seal-Tex consists of a base cloth of cotton fabric with a front and back vynal coating. The resin coating is mixed with plasticizers, color pigment, flameproofing compounds, stabilizers and solvents. The coating is then applied to the cotton fabric by a knife or roller coating method. Heat treatment then drives off the solvents and finally fuses the coating to the base fabric.

INSPECTION AND TEST: Samples of the material were tested at the Better Fabric Testing Bureau and successfully met the requirements of the Flameproofing Rules of the Board. Th complete report is on file with and is part of the record.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Seal-Tex for voluntary use in New York City as a curtain or drapery material in places of public assembly, on condition that the requirements of the Flameproofing Rule of the Board are complied with. THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 743-63-SA—Temco Inc., Nashville, Tenn., filed

for approval of the appliance known as Temco Wall Heaters, Models WV 35-1, WV60-1 and AVW50-2 under the provisions of Article 12, Chap. 26, Administrative Building Code.

PROPOSED USE: As gas-fired room heaters.

DESCRIPTION: These Temco heaters are designed for installation against a wall or in a recess. They consist of a cast iron slotted port atmospheric type burner with controls, a Ceramiclad 20 ga. steel heat exchanger and a 4" vent opening with draft hood for connection to out doors. The enclosing jacket is made of 22 ga. steel finished in baked enamel and is provided with top and bottom louvers, for natural convection flow of heated air.

The heaters are equipped with a thermostat control on the side or mounted on the wall. They have self-generating operating and and safety controls with pilot and thermocouple. Flame failure will cause closure of the automatic gas valve stopping the flow of gas.

The Model WV35-1 has an input capacity of 35,000/Btu per hr., the Model WV60-1, 60,000/Btu per hr. and the Model AVW50-2, 50,000/Btu per hr.

A fan attachment with adjustable automatic control is optional equipment.

INSPECTION AND TEST: All data Submitted was examined by Assistant Engineer G. F. Sklenarik.

These Temco heaters have been tested and approved by the American Gas Association as gravity type wall furnaces and also when equipped with the applicant's No. AW-15-2 blower assembly.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Temco Wall Heaters, Models WV35-1, WV60-1 and AWW50-2 for use in New York City in accordance with this report, the American Gas Association approval and the requirements of Article 12, Chap. 26, Administrative Building Code. East heater shall bear a label, permanently affixed, reading: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 743-63-SA."

and Company, Inc., Wharton, New Jersey, filed for approval of the material known as Vicrwall, a vinyl fabric backed wall covering, under the provisions of C26-667.0.7.b, Administrative Building Code.

PROPOSED USE: As a wall covering placed on an incombustible backing.

DESCRIPTION: Vicrwall is composed of a woven cotton fabric covered with a compound of vinyl resin, pigment and plasticizer. It is embossed in various patterns and is available in 20 colors. It varies in weight from 7 to 13 ounces per square yard with thicknesses from .017 to .020 inch accordingly to pattern and quality.

INSPECTION AND TEST: A sample of Vicrwall weighing 10.7 oz per yard with a thickness of 15 mills was adhered to an incombustible board and subject to a tunnel test in accordance with the provisions of ASTM E 84-61. The results showed a flame spread rating of 3, a fuel contributing factor of 0 and a smoke density factor of 4.

The test was conducted at the Southwest Research Institute, San Antonio, Texas.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Vicrwall .017 to .020 inch thick for use as a veneering material under the provision of C26-667.0.7.b Administrative Building Code. Each container or wrapper in which Vicrwall will be marketed shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 904-64-SM".

Absent: Chairman Foley 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 40-65-SA—Dunham-Bush, Inc., West Hartford, Connecticut, filed for approval of the appliance known as RMC Roof Mounted Conditioners, Models 500, 750, 1000, 2000, 2000-2, 2500-2, and 3000-2, under the provisions of Article 18, Chapter 19 and Article 12, Chapter 26, Administrative Bldg. Code.

PROPOSED USE: As a cooling and heating unit or as a cooling unit only, for commercial and industrial occupancies.

DESCRIPTION: The RMC conditioners are designed for roof top installation.

They are made up with an approved Janitrol gas-fired furnace and a mechanical refrigerating system with air

cooled condenser. For cooling only, the heating section is eliminated.

The base of the unit is made up of 6 inch channels with intermediate channels and angles to form a frame. The equipment is mounted on this frame and enclosed in a weatherproof insulated metal casing.

Air cooling and heating are supplied through air ducts extending from the RMC unit to the adjacent interior conditioned space. Air cooling is obtained by passage of air over a direct expansion refrigeration coil. Heating is by means of the Janitrol gas-fired forced air furnace. Combustion products are vented to atmosphere.

The heat input capacities for the eight models vary from 200,000 for the Model 500 to 600,000 Btu per hour for the Model 3000-2 with a cooling capacity varying from 65,000 to 365,000 Btu per hour. The refrigerant used is R-22.

The suffix numeral "2" in the model designated indicates that dual condensing units are installed in the conditioner. **INSPECTION AND TEST:** All data submitted was examined by Assistant Engineer G. F. Sklenarik.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as RMC Roof Mounted Conditioners, Models 500, 750, 1000, 2000, 2000-2, 2500-2, and 3000-2, for use in New York City in accordance with this report and the requirements of Article 18, Chapter 19 and Article 12, Chapter 26, Administrative Bldg. Code, except that the furnace need not be connected to a legal chimney or separate flue. All electrical work shall conform to the Electrical Code of the City of New York. Each unit shall bear a label, permanently affixed, reading: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 40-65-SA".

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reas:

568-65-SA—Preway, Inc., manufacturer, Wisconsin Rapids, Wisconsin, filed for approval of the appliance known as Preway Gas-Fired Vented Heaters, various models, also to be marketed as Kenmore, Wizard and Coronado, various models, for use in New York City under the provisions of Chapter 26, Article 12, Administrative Building Code and Multiple Dwelling Code.

PROPOSED USE: A vented gas-fired space heater.

DESCRIPTION: The Preway Gas-Fired Vented Heaters are manufactured in four series, various models. The additional heaters manufactured by Preway are identical to the corresponding models marketed for Sears, Roebuck & Co., Tradename—Kenmore; Western Auto Supply Co., Tradename—Wizard; Gamble-Skogmo, Inc., Tradename — Coronado; various models, except for front face cabinet control panel design and tradename identification.

The Preway, SVN-15 Series Model SVN-15-A3000, heater is constructed of a 20 gauge steel cabinet, 18" wide x 18¾" x 9" deep. A porcelain enamel continuous seam welded 21 gauge combustion chamber and heat exchanger. A stainless steel ribbon port burner. The burner is match lit. A draft diverter is connected to the heat exchanger at rear of cabinet.

The SVN 30 Series is similar to the SVN 15 Series, except for BTU/hr. input, flue pipe diameter and cabinet height.

The heaters are AGA approved with an optional blower.

The suffix letter after each model number indicates type of control valve used with each heater.

Suffix S—100% Shutoff valve and pilot burner.

Suffix T—100% Shutoff valve and pilot burner with modulating non-electric thermostat control.

Suffix E—100% Shutoff valve and pilot burner with electrical wall thermostat control.

The following show the corresponding numbers of the:

30,000	SVN-30-A3000	155.85241	7WC-7530	GS17-2647A

The Wizard and Coronado Room Heaters, as shown, are equipped with 100% Shutoff automatic pilot valve.

The 15,000 and 30,000 BTU/hr. input room heater controls are AGA approved without a gas pressure regulator.

The DVP Series is basically similar to the SVN Series, except for different types of controls and BTU/hr. input.

MINUTES

The DVP-35-A3002 unit has a rear economizer. The DVP-55-A3002 and DVP-70-A3002 units have dual burners.

The FVP Series is basically similar to the SVP Series, except for different type of controls, two fans, BTU/hr. input and dual burners.

The CVP Series is basically similar to the SVP Series, except for different type of controls, BTU/hr. input and the addition of ceramic radiants and pyrex glass front. The model CVP-55-A3006 has dual burners.

The following shows the corresponding numbers of the:

BTU/hr.	Preway	Kenmore	Wizard	Coronado

70,000	CVP-70-A3006	155.85524	7WC-7571	GS17-2652A

The room heaters from 35,000 to 75,000 BTU/hr. are equipped with 100% shutoff automatic pilot valve and with modulating type non-electric thermostat controls, and pressure regulator.

The suffix "E" after Preway Model numbers when equipped with 100% shutoff automatic safety valve with electrical wall thermostat, and pressure regulator.

INSPECTION AND TEST: All data was examined by Assistant Architect T. W. Farricker, Jr.

The heaters were tested and approved and certificates issued by the American Gas Association.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Preway Gas-Fired Vented Heaters, Models SVN-15-A3000, SVN-30-A3000, DVP-35-A3002, DVP-55-A3002, DVP-70-A3002, 70-A3006; also to be marketed as Kenmore Models, 155.-85231, 155. 85241, 155.85454, 155.85464, 155.85474, 155.-85664, 155.85674, 155.85514, 155.85524; Wizard Models 7-WC-7515, 7WV-7530, 7WC-7535, 7WC-7555, 7WC-7570, 7WC-7575, 7WC-7571; Coronado Models GS-17-2646A, GS17-2647A, GS17-2648A, GS17-2649A, GS17-2650A, GS17-2653A, GS17-2654A, GS17-2651A, and GS17-2652A, for use in New York City under the provisions of Chapter 26, Article 12, Administrative Building Code and Multiple Dwelling Code with a minimum clearance to adjacent combustible construction of 6 inches from packet, sides and rear, and 2 inches from projecting flue box or draft hood. All heaters are to be vented. These units shall not be installed in garages or places of explosive atmosphere. Each heater shall bear a label or plate, permanently affixed, reading: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 568-65-SA". Only heaters equipped with an automatic gas valve and safety pilot shall be used.

WHEREAS, the report of a Committee on Test reads: 1238-65-SM—Pittsburgh Plate Glass Co., Pittsburgh, Pa., filed for approval of the material known as PPG Fiber Glass Insulation under the provisions of C26-191.0, Administrative Building Code.

PROPOSED USE: Thermal insulation.

DESCRIPTION: The material is either a glass fiber blanket with and without a coating, and/or facing of aluminum foil, neoprene, mat, peoprene coated mat, vinyl, vinyl-scrim foil and foil scrim kraft on one surface of the material or of circular cross section, wire reinforced, coated on the inside with or without a vinyl film and jacketed on the outside. The fiber with the same facings glass ranges in density from 0.75 to 3.00 lbs/cu. ft.

INSPECTION AND TEST: The applicant has submitted reports of tests conducted by Thermal Conductivity Laboratories, Minneapolis, Minn., as to the thermal conductivity (K) of the various densities and thicknesses; by Pittsburgh Testing Laboratories as to the erosion properties and by the Underwriters' Laboratories and Southwest Research Institute as to flame spread classification. All reports are on file with and are part of the record.

The applicant has also submitted copies of the approval granted by the United States Coast Guard for use of this material as an incombustible material.

The flame spread rating is dependent on the facing material used. The basic material has a flame spread rating of 15 and the maximum of 45 was the insulation with a foil-scrim kraft facing which consists of a glass scrim reinforced aluminum foil and treated kraft laminate.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as PPG Fiber Glass Insulation for voluntary use in New York City as a thermal insulation under the provision of C26-191.0, Administrative Building Code. All cartons or wrappers in which the material is marketed shall be labeled: "Approved by the Board of Standards and Appeals for use in New York City under Cal. 1238-65-SM." *CORRECTION

That portion of the minutes of the meeting of the Board of Standards and Appeals held on June 2, 1965, as they appeared in Bulletin 23, Vol. 50, are hereby corrected to read as follows:

1301-64-SM .

APPLICANT—Patent Scaffolding Company, Division of Harsco Corporation, owner.

APPEARANCES—

For Applicant: William Eipel and Arthur C. Borgman.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox, Commissioner Becker and Commissioner Klein 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

1301-64-SM—W. Eipel for Patent Scaffolding Company, Division of Harsco Corp., Long Island City, New York, filed for approval of the material known as Trouble Saver Sectional Shoring (Standard Duty) and 20K Heavy Duty Sectional Steel Shoring under the provisions of the Rules of the Board adopted under Cal. No. 784-41-SR.

PROPOSED USE: Temporary support in the shoring of concrete beams, floors, etc.

DESCRIPTION: The 20K shore is designed to carry a 10,000 lb. load on each leg. The shores are individual frames. The frames are 4'-0" wide and range in height from 3'-6" to 6'-0". The leg material is 2 3/8 inch O.D. by 0.154 inch wall steel tubing, and the rungs are 1 1/2 inch O.D. by 0.108 inch wall tubing. When erected, the frames sit on steel base plates and the lowest frame may have a screw leg inserted into the opening of the leg and base plate so as to provide a leveling device.

The standard duty shore is designated as Mason Type Frame, Deep Truss, Shallow Truss, and Ladder Frame. The Mason, Deep and Shallow Trusses are 5'-0" wide frames. The ladder frames are 22 or 36 inches wide and the heights of the frames range from 3'-0" to 6'-6".

The material used in the manufacture of the frames is 1 1/2 inch O.D. by 0.108 inch wall steel tubing for the legs and main bearers, and 1.050 O.D. by 0.086 inch wall steel tubing for the diagonals. The diagonal braces to connect the frames is either 1 1/4 inches x 1 1/4 inches x 3/8 inches steel angles or 1-1/16 inch O.D. by 0.086 inch wall steel tubing.

The applicant has submitted a drawing "SS-502". This

drawing details the construction of the frames. This drawing also has a schedule of allowable leg loads.

INSPECTION AND TEST: The applicant has submitted a report of tests conducted by Columbia University. The tests were conducted on frames with total heights ranging from 7'-1 1/2" to 16'-7 1/4". In three of tests, the leg screws were exposed to the maximum length of 1'-4".

RECOMMENDATION— The Committee on Test recommends the approval of the material known as 20K Heavy Duty and Sectional Steel Shoring (Standard Duty), as a temporary support for shoring up concrete beams and floors, when installed in accordance with the requirements of the Rules of the Board adopted under Cal. No. 784-41-SR, under the following conditions: The load limitation based on a factory of safety of 2 1/2 to 1, for the 20K Heavy Duty Sectional Steel shall not exceed 10,000 lbs. on a leg. The load on the Trouble Saver Sectional Shoring (Standard Duty) shall be in accordance with the following table:

Group	Screw Leg Adjustment			
	Up To			
	10"	10" to 12"	12" to 14"	14" to 16"
1- Ladder	3600	3400	3200	3000
2- Frames				
4'-0" & 6'-6"	4250	4000	3750	3500
3- Frames				
4'-6" & 5'-0"	5000	4750	4500	4250

Each shore shall bear a label, permanently affixed, reading: "Approved by the Board of Standards and Appeals for use in New York City under under Cal. No. 1301-64-SM".

All of the recommended practices and rules known as Recommended Standard Safety Code for Vertical Shoring and Recommendations for use of Steel Scaffolding and Shoring Institute shall be followed, and copies of these rules and regulations are to be filed with the Department of Buildings, except that the Rules of the Board adopted under Cal. No. 784-41-SR shall be followed, if there is any conflict.

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. Purchase payment by postage stamps **NOT ACCEPTABLE**.

COURT DECISION.

Matter of Smalls vs. Board:—On April 7, 1964, the Board denied the application based on a decision of the Borough Superintendent, under Section 72-21 of the Zoning Resolution and Section 666 of the New York City Charter, to permit in a R2 district, the change in occupancy of an existing two story building from a one family to a two family dwelling; Calendar Number 980-63-BZ; Premises 1286 Carroll Street, south side, 320 feet east of New York Avenue, Block 1291, Lot 24, Borough of Brooklyn.

At Supreme Court, Special Term, Part I, Mr. Justice Anfuso rendered the following decision:

"The discretion to grant variances is rested with the respondent and the court may not substitute its judgment for that of the Board, or interfere with the exercise of the Board's discretion unless it is arbitrary, capricious or contrary to law (Matter of Corbett v. Zoning Board of Appeals, 283 App. Div. 282; Matter of Ernst v. Board of Appeals of New Rochelle, 274 App. Div. 809, aff'd. 298 N.Y. 831). Accordingly, respondents' motion to dismiss the petition and to vacate the order of certiorari issued May 4, 1964, is granted without costs. Settle order on notice."

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. COURT DECISION.

Matter of Bernstein vs. Foley:—On June 8, 1965, the Board denied the application, based on a decision of the Borough Superintendent, to permit under Section 72-21 of the Zoning Resolution in a R3-1 district the construction of an accessory garage to a one family dwelling that encroaches on the required side yard and outer court; Calendar Number 184-65-BZ; Premises 267 Exeter Street, east side, 270 feet north of The Esplanade, Block 8743, Lot 20, Borough of Brooklyn.

At Supreme Court, Special Term, Part I, Mr. Justice Capozzoli rendered the following decision:

"Petitioners instituted this article 78 proceeding, by order of certiorari, to review the determination of the Board of Standards and Appeals (hereinafter referred to as the "Board") which denied petitioners' application for a variance of the requirements of sections 23-44, 23-461 and 23-84 of the Zoning Resolution (effective December, 1961) as to permit the construction of a one-family dwelling accessory garage that would encroach upon the required side yard and outer court areas. After a public hearing, pursuant to New York City Charter, section 666, at which time petitioners' attorney was heard in support of the application and an adjoining property owner spoke in opposition thereto, and after an inspection of the subject premises and neighborhood, the Board determined each of the five statutory requirements for the grant of a variance based upon unnecessary hardship adversely to petitioners (see Zoning Resolution, 1961, sec. 72-21 "Findings Required for Variances"). The law is well established that "in reviewing board actions as to variances or special exceptions the courts do not make new or substitute judgments but restrict themselves to ascertaining whether there has been illegality, arbitrariness and abuse of discretion. Petitioners, who acquired title to the subject property on October 2, 1964, do not deny that they have access to off-street parking by a curb cut which enables parking of a motor vehicle in the north side yard. That the proposed garage will enhance the value of the petitioners' property and afford more protection to the property owners' car cannot be denied. These factors, alone, however, do not warrant reversal of an administrative determination denying a variance from a zoning regulation. Nor may petitioners' views with respect to the effect of construction of the proposed garage upon the adjoining property and the neighborhood be granted greater weight than those of the Board. Under all the circumstances, it cannot be said that judicial intervention is warranted or proper. Accordingly the order of certiorari is vacated, the application is denied and the petition dismissed.

758-58-SA—Amendment to resolution as to additional models of gas-fired boilers.

General Automatic Products Corp., Baltimore, Maryland, requested that the resolution adopted March 31, 1959 and amended December 13, 1960 and June 6, 1961, under Calendar Number 758-58-SA, be reopened and amended so as to include additional models of gas-fired boilers.

PROPOSED USE: Gas-fired hot water boilers for domestic heating.

DESCRIPTION: The requested hot water heating boilers are designated as follows: LC Series, LCL Series, LCT Series, and CT Series.

The new series are basically similar to the presently approved series, except the LC Series are sectional cast iron

MINUTES

gas-fired hot water heating boilers built in nine sizes and identified by following model numbers:

Model No.	AGA Input
LC- 72	72,000 BTUH
LC-105	105,000 "
LC-140	140,000 "
LC-175	175,000 "
LC-204	204,000 "
LC-238	238,000 "
LC-272	272,000 "
LC-306	306,000 "
LC-340	340,000 "

The LC-72 model consists of one L.H. standard end section, one R.H. standard and end section and one intermediate section assembled by conventional push nipples and draw rods. This assembly is assembled to steel base that supports two burners and necessary gas piping, safety pilot and automatic valve. Each successive larger size includes an additional intermediate section and an additional burner.

Maximum number of intermediate sections being nine and maximum number of burners ten in the LC-340 model.

The assembly above the base is enclosed in a 22 gauge steel shroud that also serves as a built-in draft diverter. Surrounding this entire assembly is an insulated 22 gauge steel decorative jacket.

The LC models are available in "All Purpose Packaged Models" normally used on gravity flow installations and the "Standard Packaged Model" completely assembled with circulating pump. Both of the models are always shipped completely assembled with jackets and all components.

The LCL Series is basically similar to the LC Series, except the LCL Series has provisions for one tankless domestic hot water coil. The LCL Series are identified by the following model numbers:

Model No.	AGA Input
LCL- 72	72,000 BTUH
LCL-105	105,000 "
LCL-140	140,000 "
LCL-175	175,000 "
LCL-204	204,000 "
LCL-238	238,000 "
LCL-272	272,000 "
LCL-306	306,000 "
LCL-340	340,000 "

The LCL are available with circulating pump for use only on forced circulating systems.

The LCT Series is basically similar to the LCL Series, except the LCT Series has provisions for two tankless domestic hot water coils. The LCT Series are identified by the following model numbers:

Model No.	AGA Input
LCT- 72	72,000 BTUH
LCT-105	105,000 "
LCT-140	140,000 "
LCT-175	175,000 "
LCT-204	204,000 "
LCT-238	238,000 "
LCT-272	272,000 "
LCT-306	306,000 "
LCT-340	340,000 "

The CT Series are all copper hot water heating boilers built in two sizes and identified by the following model numbers:

Model No.	AGA Input
CT-100	100,000 BTUH
CT-130	130,000 "

Each unit consists of a fabricated all copper pressure vessel assembly. All pressure parts are round copper tubing. This assembly is supported by attachment to a 16 gauge steel base and vertical support. Also supported on the vertical support is the stainless steel burner assembly.

Attached and assembled to the top of pressure vessel is a draft diverter. Surrounding entire assembly is an insulated 22 gauge steel decorative jacket.

Each unit is always shipped complete with circulating pump for use only on forced circulation systems. These units are always shipped completely assembled with jacket and all components.

All the above series boilers are built in accordance with and marked as conforming to Section IV of the A.S.M.E. Boiler Construction Code governing construction of Low Pressure Heating Boilers. These units are also built in accordance with A.S.A. American Standard 221.13.1-1961 as tested and approved by the American Gas Association, Inc. Laboratories.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted March 31, 1959 and amended December 13, 1960 and June 6, 1961, under Calendar Number 758-58-SA, be reopened and amended so as to include additional General Automatic gas-fired hot water domestic heating boilers, Models:

LC, LCL LCT 72
LC, LCL, LCT 105
LC, LCL, LCT 140
LC, LCL, LCT 175
LC, LCL, LCT 204
LC, LCL, LCT 238
LC, LCL, LCT 272
LC, LCL, LCT 306
LC, LCL, LCT 340,

cast iron gas-fired boilers and Models CT 100 and CT 130 copper gas-fired boilers, on condition that the requirements of the resolution adopted March 31, 1959 and amended December 1960 and June 6, 1961, under Calendar Number 758-58-SA, be complied with.

Absent: Chairman Foley 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

175-64-SA—Westinghouse Electric Corp., Mansfield, Ohio, filed for approval of the appliance known as Westinghouse Double Loader Washers, Models LDM-20, LDM-20-3, LD-20, LD-20-3, LDM-20A and LDM-20-3A, under the provisions of the Submerged Inlet Rules of the Board.

PROPOSED USE: Automatic clothes washing machines.

DESCRIPTION: The Westinghouse washers are self-contained cylinder types that perform automatically a washing operation, a spray rinse, two deep rinses and three high spin extractions in a total elapsed time of 27¾ minutes.

The machines have a capacity of 20 lbs. dry weight and water consumption is 28 gallons hot and 22 gallons cold per cycle.

During washing and rinsing cycles the cylinder rotates at 50 rpm and during extraction at 460 rpm. The loading door has a safety switch which stops the machine if the door is opened.

Water supply is introduced into the machine through a 1½" air gap.

The Model LDM-20 and the LDM-20A are coin-operated units operating on single phase a.c.; the 20A model has an additional position on the temperature selector to allow for a cold water wash. The relays used to reverse the pump and blower motor for the drain and spin part of the cycle in the 20 model have been eliminated and the reversal is performed by the timer.

The Model LD-20 is a non-coin operated version of the LDM-20.

The suffix numeral 3 indicates that the particular unit operates on 3 phase a.c.

INSPECTION and TEST: All data submitted has been examined by Ass't. Engr. G. F. Sklenarik.

The Models LD-20 and LDM-20 units have been approved by Underwriters' Laboratories, file E19073.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Westinghouse Double Loader Washers, Models LDM-20, LDM-20-3, LD-20, LD-20-3, LDM-20-A and LDM-20-3A, under C26-191.0.a as meeting the requirements of Rule 2 of the Submerged Inlet Rules and as meeting the requirements of C26-1277.0.h when connected for the individual unit, and for more than one unit, provided that the connections to the waste line shall be in accordance with the following:

Maximum No. Per Battery	Waste Line Diameter
3	2"
12	3"
30	4"

Slop Sink Requirements:

Water line diameter 2½ inches to 4 inches slop sing 3' x 3' x 3'. All slop sinks to have mushroom strainers having a diameter the same size as the waste line.

The foregoing table is based upon there being no specific provision for this type of equipment in C26-1291.0 wherein the fixture equivalents can be determined from the table contained therein for equipment when connected in batteries and in addition, the discharge pump on each individual washing machine unit greatly facilitates the rate of discharge to the waste line. In all cases the size of the trap and branch to the soil stack from the slop sink to be one commercial size larger than the branch line header connection in the battery units.

Each unit shall bear a label reading as follows: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 175-64-SA". All installations in batteries shall be submitted to the Department of Buildings and Department of Water Supply, Gas and Electricity for inspection, in order that the requirements of this approval be complied with.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 933-64-SA—Gilbert and Barker Mfg. Co., West Springfield, Mass., filed for approval of the appliance known as Gilbarco Trimline Series, Gasoline Dispensers Models 454-110, 454-010, 455-110, 455-010, 464-111, 464-011, 465-111 and 465-011 under the provisions of C19-69.0.c Administrative Code.

PROPOSED USE: As gasoline blending pumps and dispensers.

DESCRIPTION: The Model 454-110 is a single blending pump and provides a means to automatically deliver a blend of two different octane gasolines and dispensing this blend from one meter and one hose outlet.

This pump consists of two motors, two pump units, two air separators, one equalizing valve, two orifice plates, two pressure regulating check valves, a manifold, a meter, a computer and a hose with nozzle.

The motors are ⅓ hp., 115/230v, 60 cycle a.c., explosion proof.

The equalizing valve and manifold assembly which consists of orifice plates, pressure regulating check valves and manifold is the controlling device to blend the two products and it is internally set to dispense a present blend.

Should either one of the two storage tanks run dry, pressure at the inlet side of the equalizing valve piston

MINUTES

will drop to zero pressure. This drop in pressure will cause an unbalanced condition and will permit the equalizing piston to move to the zero pressure side of the equalizing valve by the pressure developed by the pump unit delivering product from the non-empty tank. In so doing, the inlet openings in the equalizing valve of the side having product will be closed and practically no product will be delivered to the water.

The Model 454-010 is a dispenser similar to the Model 454-110 except that it is designed for remote control application. Therefore the motors, pump units, air separators with their sumps have been removed. Air separation takes place at the remote pumping units which pump the two products from their respective storage tanks.

This dispenser is equipped with a solenoid operated feed line valve (Underwriters' Valve) which is operated by a switch mechanism to electrically open and close the valve in sequence with the start and stop of the remote pump unit motor. This valve has a built in pressure relief device to prevent excessive pressure in the meter and hose.

The Model 464-111 is the same as the 454-110 except that the housing is extended 4 inches to permit the installation of internal fluorescent lights and ballast.

The Model 464-011 dispenser is the same as the 454-010 except that the housing has been extended 4 inches for installation of internal fluorescent lights and ballast.

The Model 455-110 pump is similar to the 454-110 but is equipped with a roller clock.

The Model 455-010 dispenser is similar to the 454-010 but is equipped with a roller clock.

The Model 465-111 pump varies from the 464-111 only in that it is equipped with a roller clock.

The Model 465-011 dispenser varies from the 464-011 only in that it is equipped with a roller clock.

On all models the rate of flow is 15 gallons per minute or less. Hose is 12 feet long. Nozzles are non-automatic or approved automatic type.

INSPECTION AND TEST: All data was examined by Assistant Engineer G. F. Sklenarik.

These pumps and dispensers have been approved by Underwriters' Laboratories, File MW 1941 A and B.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Gilbarco Trimline Series Gasoline Dispensers, Models 454-110, 454-010, 455-110, 455-010, 464-111, 464-011, 465-111 and 465-011 for use in New York City under the provisions of Section C19-69.0.c Administrative Code provided that each model shall bear a label, permanently affixed, reading: "Approved by the Board of Standards and Appeals for use in New York City under Cal. Negative: Commissioner Fox 1
Absent: Chairman Foley 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 956-64-SA—Air Products & Chemicals, Inc., Allentown, Penna., requested that the resolution adopted July 13, 1965, under Cal. No. 956-64-SA, be reopened and amended so as to include new maximum working pressures with corresponding changes in relief valve and rupture disc settings for their cryogenic storage vessels known as Customer Liquid Storage Units.

PROPOSED USE: Cryogenic storage vessels.

The Customer Liquid Storage Units involved, Models CLS-2400, CLS-4600, CLS-7500, and CLS-20,000 made with inner containers of 9% nickel alloy steel and outer jackets of carbon steel were previously approved July 13, 1965, under Cal. No. 956-64-SA, for maximum working pressures of 75 psi, 45 psi, 70 psi, and 83 psi, respectively. The applicant requests that the working pressures be changed to conform more closely to the permissible working pressures allowed by the ASME code. Corresponding changes would be made in the settings for relief devices.

The new maximum working pressures and relief valve and rupture disc settings will be:

	Max. W.P.	Relief Valve	Disc
CLS-2400	83	83	95
CLS-4600	83	83	95
CLS-7500	80	83	92
CLS-20000	80	83	92

RECOMMENDATION: The Committee recommends that the resolution adopted July 13, 1965, under Cal. No. 956-64-SA, be reopened and amended so as to include new maximum working pressures and relief valve and rupture disc settings as set forth herein for the Air Products and Chemicals, Inc., Customer Liquid Storage Units, Models CLS-2400, CLS-4600, CLS-7500, and CLS-20,000.

All other requirements of the resolution adopted July 13, 1965, under Cal. No. 956-64-SA, and as modified by General Resolution 1180-65-GR, shall be complied with.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
1150-64-SM—Armstrong Cork Company, Inc., New York City, filed for approval of the material known as Armstrong Ventilating Travertone Fire Guard Tile under the provisions of C26-588.0 through C26-590.0 Administrative Building Code.

PROPOSED USE: Acoustical tile used as Component part of a two-hour fire resistant floor and/or roof construction.

DESCRIPTION: The construction is a floor and ceiling assembly consisting of a 2½ inch thick concrete floor supported by steel joists and protected with a suspended ceiling consisting of 24 x 24 x ¾ inch thick acoustical tile, recessed light fixtures and air ducts.

The acoustical tile is a mineral tile and has been approved by the Board under Calendar Number 72-59-SM.

The construction is as follows: Steel joists are first installed and are bridged with steel bars, welded to the upper and lower chords of the joists. Ribbed metal lath is placed on top of the joists and is wire-tied to each joist. Concrete is then poured to a depth of 2½ inches over the steel joists.

Hanger wires for the suspended ceiling are wrapped around the lower chords of the joists. The free ends of the wires are wrapped around the channel. The channels are installed parallel to the joists and are supported by the tie wires on 4'-0" centers. The channels are also located on both sides of the light fixtures.

The air ducts are supported by two different methods. One method is to attach hanger straps of 1¼ inch wide No. 24 gauge steel, two on each side of each duct, and bent to hang over the lower chord of the joists and secured with two 0.072 inch diameter rivets. Two rivets are also used to attach the ducts to the straps. The other method of duct support was with lengths of 1½ inch channels placed across the bottom chords of the joists.

Two yokes, spaced 36 inches apart, are used to support each light fixture. The yokes are attached by means of brackets and steel nuts and bolts to cold rolled channels.

Both the air ducts and light fixtures are protected with a box made of the same material as hte acoustical tile except that the thickness is ½ inches.

The "Z" bars are spaced 2'-0" and are attached to the bottom of the cold rolled channels by means of wire clips. The acoustical tile is installed by inserting the leg of the "Z" runner into the kerf of the tile. Cross tees are used, running perpendicular—to the "Z" runners to help support the tile. The construction is in accordance with Dwg. R4177-25 Ill. 1.

INSPECTION & TEST: A construction as herein described was tested at the Underwriters' Laboratories in accordance with the requirements of C26-588.0 through C26-590.0 Administrative Building Code and the construction successfully met the requirements of a two-hour fire resistive floor construction. The complete report is on file with and is part of the record.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Armstrong Ventilating Travertone Fire Guard Tile for use in New York City as a component part of a two-hour fire resistive floor, on condition that the construction is as herein described and in accordance with Dwg. R4177-25 Ill. 1, except that hangers, in accordance with the requirements of C26-461.0 Administrative Building Code, shall be used instead of wires when the suspended ceiling is 6 inches or more below the lower flanges of the joists. All cartons in which the material is marketed shall be labeled "Approved by the Board of Standards and Appeals for use in New

13-65-SA—Reda Pump Co., Bartlesville, Oklahoma, filed for approval of the appliance known as Reda Hydrocarbon Pumps. Various Models under the provisions of Chapter 19, Administrative Code.

PROPOSED USE: Gasoline submersible pump.

DESCRIPTION: The various models of the pumps are basically the same, the only difference between the models being the increased size of parts as the horsepower and pump capacities increase.

The pump housing or case is steel tubing and contains the pump bowl and impellers. The jacket, surrounding the electric motor is of carbon steel. The diffuser or bowl is bronze. The impellers of the mixed flow or mixed type are of bronze and are cast in one piece. The shaft is of nickel alloy steel. The pump intake is located at the lower most part of the pumping assembly and is equipped with an intake screen of corrosion resistant material.

The motors used in conjunction with the pumps are explosion proof motors Class 1, Group D; approved by the Underwriters' Laboratories. The motor is furnished with a magnetically operated starter. The protective equipment consists of a thermosat or magneic overload device which is manually reset.

INSPECTION AND TEST: Details of construction were examined by Assistant Engineer J. A. Darts. The motor controllers have been approved by the Underwriters Laboratories under MH 6777, MH 6777A and MH 6777B. The motors have been approved under E 25511 and the pumps under MH 6560.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Reda Hydrocarbon submersible for service stations and garages Series G. for use in New York City when installed in accordance with the requirements of C19-69.c Administrative Code; that all electric work conform to the Electrical Code. PROPOSED USE: Gas-fired Built-In Ovens and Counter Top Sections for cooking purposes.

DESCRIPTION: The NuTone gas-fired built-in ovens (oven and broiler section only) OG-222 Series consists of a 24 gauge steel cabinet with a blanket of fiberglass insulation surrounding the sides, top and back. The oven and broiler liner and oven and broiler bottom are of 20 gauge steel finished in porcelain enamel. The oven size is 39" high x 18" wide x 26 1/8" deep using a cast iron burner rated at 19000 BTU/hr. input on natural, manufactured, mixed and liquefied petroleum gases. The orifice is universal type. The oven door has a glass window. The oven and broiler door panels and linings are 20 gauge steel. The oven and broiler racks and guides are chrome finished steel. All ovens have chrome finished door lining.

The controls consist of a Robertshaw M. P. thermostat and Robertshaw automatic safety cut-off valve. The clock is made by Lux, their 64684009.

The OG-222 Series are made in six colors and each has its own model number, which are as follows:

- Model OG-2220—white porcelain enamel doors.
- Model OG-2225—turquoise porcelain enamel doors.
- Model OG-2226—pink porcelain enamel doors.
- Model OG-2227—yellow porcelain enamel doors.
- Model OG-2228—brushed chrome.
- Model OG-2229—colonial copper porcelain enamel doors.

The NUTone gas-fired counter top section (top section only) TG-221 Series is 28 1/4" long and 20 3/4" deep. The main top is made of 18 gauge steel. An escutcheon assembly with control knobs are at the right side. The burner box is made of 20 gauge steel. The aeration bowls are made of 20 gauge steel and are chrome plated. The top burners and valves (hi-lo) are made by Lincoln Brass Works. The top burner lighters are made by Lincoln Brass. Works. The top burner lighters are made by Lincoln Brass. The rear burners are rated at 9,000 BTU and the front burners are rated at 12,000 BTU for use with natural, manufactured and mixed gases. For use with liquefied petroleum gases, the front and rear burners are rated 8,000 BTU/hr. input. The orifices are universal type.

The TG-221 Series are made in six colors and each has its own model number, which are as follows:

- Model TC-2210—white porcelain enamel.
- Model TG-2216—pink porcelain enamel.
- Model TG-2217—yellow porcelain enamel .
- Model TG-2218—brushed chrome.
- Model TG-2219—colonial copper.

The TG-221 Series is AGA approved with minimum horizontal distance from center of burner heads to adjacent vertical walls extending above the top panel, 12" from right wall, 9" from left wall, and 9" from rear wall.

INSPECTION & TEST: All details of construction were examined by Ass't. Architect T. W. Farricker, Jr. The ranges were tested and approved and certificates issued by the American Gas Association.

The complete report is on file with and is part of the record.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Nutone Built-In Ovens, Models OG-2220, OG-2225, OG-2226, OG-2227, OG-2228, and OH-2229; and counter top

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 626-65-SA—Fire Controls Inc., Woodside, N.Y., filed for approval of the appliance known as Supervised Relay Panel, Model FCU-4MN under the provisions of the Interior Fire Alarm Rules of the Board and the Rules for Thermostatic Fire Alarm Systems of the Fire Department. **PROPOSED USE:** As a relay panel for control of devices such as fan motors.

DESCRIPTION: The model FCU-4MN panel is a closed circuit electrically supervised panel made up of four multiple contact relays, four trouble supervising relays, one multiple contact master alarm relay, two 6 ampere fuses, a silencing switch, a reset switch and terminals for the external wiring. These components are mounted on a 1/2 inch thick ebony asbestos panel 18 inches wide—16 3/8 inches high which is enclosed in a steel box. The panel operates on 120/208 volt a.c. power.

Upon actuation of a normally open alarm initiating device, such as a smoke detector, the individual alarm relay connected to that detector will operate to stop fan motors. The four relays used in the panel are provided to cover four separate areas or zones.

The master relay when actuated by an interior fire alarm or sprinkler alarm system will operate the four zone relays simultaneously shutting down or starting all devices connected to these relays.

INSPECTION AND TEST: This panel was inspected and tested at 37-55 61st St., Woodside, N.Y. Present were Ass't. Engineer G. F. Sklenarik, Sup. Electrical Inspector Albert Moquin, N. Y. Fire Department and Mr. John Meyer representing the applicant.

The panel effected complete shut down of a fan system (4 zone) when operated by an interior fire alarm or sprinkler alarm system and also by a thermostatic fire alarm sys-

tem. A smoke detection system was used to operate each zone relay individually.

The panel was finally tested under open circuit and ground faults. The trouble bell operated in each case. When the bell silencing switch was used to silence the bell a trouble light went on.

The Fire Department has submitted a report dated January 28, 1966, recommending this panel for use in specified applications.

RECOMMENDATION: The Committee on Test recommends the approval of Fire Controls Inc., Supervised Relay Panel, Model FCU-4 MN for use in New York City under the provisions of the Interior Fire Alarm Rules of the Board, the Rules for Thermostatic Fire Alarm Systems of the Fire Department and any additional requirements of the Fire Department provided that each panel enclosure shall bear a label, permanently affixed, reading: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 626-65-SA."

APPLICANT—Owens-Corning Fiberglas Corporation, owner.

APPEARANCES—

For Applicant: Dobson Warren.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Vice Chairman Kleinert, Commissioner Fox, Commissioner Becker and Commissioner Klein 4

Negative: 0

Absent: Chairman Foley 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

632-65-SM—Owens-Corning Fiberglas Corp., New York City, filed for approval of the material known as Owens-Corning Fiberglas Cold Storage System under the provisions of C26-191.0 and C26-88.0, Administrative Building Code.

PROPOSED USE: Cold storage room or space.

DESCRIPTION: The cold storage room or space is an interior room or space within the confines of a building and in no way is it to be construed as a structural member of the building.

The insulation is held in place by what is known as the Fiberglas non-conducting stud which is in the form of a built up girder. The flanges of aluminum are in the form of the Greek letter pi. The cross being 3 inches, the stems are 1½ inches long and the thickness is ¾ inches. The overall height is 4 inches. The web is 1½ inch thick fiberglas. The two flanges are joined together by reinforced fiberglass straps 1¼ inch wide by 1/16 inch deep, screwed into the legs of the flanges on 16 inch centers.

This same member is used as the carrying member for

the roof of the storage system and the insulation is laid on the lower flanges of the stud or joist.

The fiberglas insulation has been approved by the Board under Cal. No. 620-40-SM, and the interior finish board has also been approved under the same Calendar Number.

In erection, the studs are attached to a wall, studs spaced 4'-0" on centers, by means of low velocity powder activated fastening tool. The insulation is then applied between the studs in two layers to a total thickness of one inch less than the total insulation thickness. The finish board is then installed over the insulation and also placed between the flanges.

The roof of the box or space is installed in the same manner as the side walls, the studs being attached to the supporting steel of the structure by direct bolting. Maximum span of spacing of 4'-0" of length.

The weight of the stud is 2 lbs./lin. ft., and the insulation 2 lbs./cu. ft.

INSPECTION AND TEST: The stud was tested as a beam on a 4'-0" span. The web failed at a load of 273 lbs., and the flanges by buckling at 480 lbs. An additional test was conducted in tension to determine the load required to pull the girder apart. The load was 238 lbs.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Owens-Corning Fiberglas Cold Storage Systems for voluntary use in New York City as an incombustible cold storage space under the following conditions: That the system is not to be considered in any way as a structural member of the building; that the wall or ceiling in no way shall be considered to add or detract from the existing wall or roof of the main structure; that the storage space shall be contained within a legal building; that the side wall of this storage space shall not be considered to have any hourly rated fire resistive rating; that the roof of this box or storage space shall not be considered to be a suspended ceiling. All plans submitted to the Department of Buildings showing the proposed use of this system shall be marked: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 632-65-SM".

ucts Corp., Baltimore, Maryland, filed for approval of the material known as National Mesh under the provision of C26-1469.0, Administrative Building Code.

PROPOSED USE: Welded wire fabric for concrete reinforcement.

DESCRIPTION: The welded fabric is a prefabricated rectangular reinforcement consisting of a series of parallel longitudinal wires welded at regular intervals to transverse wires. The fabrics are produced from hot rolled rods. These rods are cold drawn through dies which gives higher yield and tensile strengths.

INSPECTION AND TEST: The applicant has submitted reports of tests conducted by Penniman and Browne, Inc., Baltimore, Maryland, showing that the material meets the requirements of C26-1469.0.b, Administrative Building Code, which calls for compliance with ASTM-A-82 and ASTM-A-185.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as National Mesh as manufactured by National Wire Products Corp., for use in New York City as metal reinforcement under the provisions of C26-1469.0, Administrative Building Code. All bundles of this material shall be tagged or labeled: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 687-65-SM".

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

688-65-SM—William A. Faiella for National Wire Products Corp., Baltimore, Md., filed for approval of the material known as National Mesh Masonry Reinforcing under the provisions of C26-430 and C26-431.0 Administrative Building Code.

PROPOSED USE: To bond withes in hollow wall construction and to be used in lieu of header courses in masonry construction.

DESCRIPTION: The masonry reinforcing is of two types; ladder type or truss type.

The ladder type; Standard-is made of 9 gauge side rods and cross wires. Heavy duty has 3/16 inch side rods and 9 gauge cross wires. The side rods are knurled to create extra mortar bond. The cross rods are spaced 15 inches on center.

The truss type—The Standard and Heavy duty are fabricated of the same materials as the ladder type. The diagonals are butt welded to the side rods.

INSPECTION AND TEST: The applicant has submitted reports of test conducted by Penniman and Browne Inc., Baltimore, Md., showing that the material complies with the requirements of C26-1469.0.b Administrative Building Code.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as National Mesh, Masonry Reinforcing, manufactured by National Wire Product Corp., for use in New York City, on the following conditions: that the material shall be hot dipped galvanized; that the material may be used as a tee for bonding withes in hollow walls as provided under C26-430.f Administrative Building Code; that the tee or lock be formed with a drip section; that the material may be used in bonding walls of hollow block, tile or structural units as provided under C26-431.0.b Administrative Building Code; that the material may be used in lieu of a header course and that the material is placed not more than 16 inches on centers in a vertical plane.

When used in lieu of headers, the type of construction known as "stacked coursing" shall not be used. All cartons in which the material is marketed shall be labeled: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 688-65-SM."

986-65-SM—Research Products Corp., Madison, Wisconsin, filed for approval of the material known as RP Paint Arrestors 3032 (filter) under the provisions of the Rules of the Board adopted under Cal. No. 353-30-SR.

PROPOSED USE: Collection of paint overspray in spray booths.

DESCRIPTION: The paint arrestor consists of multiple layers of slit and expanded fire retardant Kraft varying in pattern from coarse at the intake to fine at the exhaust.

The installation of the filter, is known as a Paint Arrestor Bank. This is formed by riveting together a number of holding frames to provide a sufficient face area for the installation. A snap-in grid is placed on the downstream

MINUTES

or exhaust side of the frame. A paint arrestor pad is then placed against the down stream grid. A second paint arrestor pad is then installed and the installation is completed.

When the pad becomes filled with paint overspray the front arrestor pad is removed; the rear one is moved to the front and a new one is placed in the rear.

INSPECTION AND TEST: The applicant has submitted a copy of the approval granted by the State Board of Standards and Appeals under certain conditions. Approvals were also granted by the Factory Mutual Engineering Division and the Underwriters' Laboratories. A report submitted by a Mr. J. A. Mullendore, Asst. Prof. Minerals and Metals Engineering, University of Wisconsin, shows that the pad meets the requirements of C26-88.0, Administrative Building Code. A letter, dated February 1, 1966, from City of New York Fire Department stating that they would have no objections to the use of these pads provided that the installation complies with the NFPA Fire Code.

RECOMMENDATION: The Committee on Test recommends that the material known as RP Paint Arrestors 3032 be approved for voluntary use in New York to collect paint overspray in spray booth under the following conditions; That the use of these filters be limited to an air spray type of operation; The spraying operation shall be so designed, installed and maintained that the average air velocity over the open face of the booth (or booth cross section during spraying operations) shall not be less than 100 lineal feet per minute; that a solenoid valve shall be installed on the compressed air pipe in such a manner that it will allow the flow of air to the spray gun only when the solenoid is energized; a device, such as a pressure switch, or air velocity switch shall be provided to de-energize the solenoid located in the compressed air line whenever the air velocity in the breathing zone of the operator falls below 100 lineal feet per minute, that filter pads shall be inspected by a responsible person after each period of use and clogged filter pads be discarded and replaced; that all discarded filter pads shall be immediately removed to a safe, well detached location or placed in a water filled metal containers and disposed of at the end of the day's operation; that this disposal shall be the responsibility of the parties doing the spray operation; that the space within the spray booth or both, the up and down stream faces of the filters shall be protected with automatic sprinklers; that the filters shall not be used when applying a spray material known to be highly susceptible to spontaneous heating and ignition; that the filters shall not be alternately used for different types of coating material, where the combination of materials may be conducive to spontaneous ignition; that all requirements of the Rules of the Board adopted under Cal. No. 353-30-SR be complied with. All cartons in which the material is marketed shall be labeled: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 986-65-SM". Filter gauge and cut off switch (BACHARACH) shall be installed in the system which is to automatically signal when it is necessary to replace the filters.

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. Purchase payment by postage stamps **NOT ACCEPTABLE**.

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
448-40-SM—Amendment to resolution as to additional floor section.

H. H. Robertson Co., Pittsburgh, Penna., requested that the resolution adopted July 9, 1940 and amended at various times through November 19, 1963, under Cal. No. 448-40-SM, be reopened and amended so as to include additional floor sections.

PROPOSED USE: Steel deck used in conjunction with a concrete slab to form composite action.

DESCRIPTION: The floor units are designated as Q-Lock Floor Units and these units are further subdivided into the QL-3, QL-UKX, QL-21, QL-NKX, and QL-NKC Sections. The designations are used primarily to designate the profile of the section.

The QL-3 Section is 24 inches wide by 1½ inches deep consisting of four cells, each cell is 3⅝ inches wide and the space between cells is 2⅝".

The QL-UKX Section is the same as the QL-3 with the addition of a cover plate welded to the bottom of the QL-3 Section.

The QL-21 Section is 24 inches wide by 3 inches deep consisting of three cells, each cell is 5⅝ inches wide and the space between cells is 2⅝ inches.

The QL-NKX Section is the same as the QL-21 with the addition of a cover plate welded to the bottom of the QL-21 Section.

The QL-NKC Section is a section, one cell wide, the top of the cell is 9½" wide and the depth is 3 inches.

All the sections have indentations at the top, embossments at the webs and buttons at the bottom.

The indentations are 1" x ⅝" x 3/32" and are spaced 1" on centers. The embossments are 2" x 5/16" x 3/32" spaced 3" on centers. The buttons are ½" diameter by 3/32" high and are spaced 3" on centers.

When used with concrete to form a composite action, the concrete to be used is a sand gravel concrete having a stress of 3000 p.s.i.

INSPECTION AND TEST: The applicant has submitted a report of a series of tests conducted by Pittsburgh Testing Laboratories. The tests were conducted on a QL-3—18 gauge, QL-21—18 gauge, QL-UKX—18/16 gauge, and QL-NKX—18-16 gauge.

In all the tests, prior to the pouring of the concrete, the steel units were greased to insure that no bond existed between the floor and the concrete and therefore, no contribu-

tion to composite action. All composite action is transferred through the mechanical lock provided by the indentations, embossments and buttons.

The other gauges of the sections were computed on the basis of accepted engineering formula in accordance with the Light Gage Steel Manual of the A.I.S.I.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted July 9, 1940 and amended through November 19, 1963, under Cal. No. 448-40-SM, be reopened and amended so as to include the material known as Q-Lock Floors with allowable loads as set forth in the applicant's catalogue, File No. 13-H, on condition that all other requirements of the resolution adopted July 9, 1940 and as amended through November 19, 1963, under Cal. No. 448-40-SM, be complied with. This amendment is limited to 16 and 18 gauge deck.

754-52-SM—Amendment to resolution as to added construction.

National Gypsum Company, Buffalo, New York requested that the resolution adopted June 2, 1953 and amended various times under Calendar Number 754-52-SM, Vol. II, be further amended to include additional form of construction.
PROPOSED USE: Wire hangers on approved suspended ceiling.

DESCRIPTION: The Gold Bond "J" Channel System is erected in the same way as the system as previously approved. The only difference is, the "J" Channel System with the 1½" carrying channels suspended by 12 gauge wire hangers when the depth of suspension between the lower flanges of the supporting steel and the underside of the ceiling does not exceed 6". If the suspension exceeds 6", hangers as required under C26-461.0, Administrative Building Code shall be used as previously specified.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted June 2, 1953 and amended various times under Calendar Number 754-52-SM, Vols. I and II so as to permit the use of 12 gauge wire as hangers in the previously approved "J" Channel System, when the depth of suspension does not exceed 6". 435-59-SM—Amendment to resolution as to additional fire resistive beam construction.

Metropolitan Spray Inc., for Sprayon Insulation and Acoustics Inc., requested that the resolution adopted October 16, 1962 and amended at various times through November 9, 1965 under Cal. No. 435-59-SM, be reopened and amended so as to include an additional fire resistive beam construction.

PROPOSED USE: Three hour fire resistive beam construction.

DESCRIPTION: There has been no change in the basic material "Spray Don". The request is to consider this material as a fire proofing for structural beams.

INSPECTION AND TEST: A beam protected with the material known as "Spray Don" was tested at the Underwriters' Laboratories in accordance with the requirements of ASTM E 119. The beams is protected with the material "Spray Don" to a tamped thickness of $\frac{1}{2}$ inch following the contour of the beam with a minimum density of 14 lbs./cubic ft. To achieve the $\frac{1}{2}$ inch tamped thickness it is necessary to apply $\frac{3}{4}$ inch of the material. The beam so protected successfully met the requirements of a three hour fire resistive beam protection.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted October 16, 1962 and amended at various times through November 9, 1965 under Cal. No. 435-59-SM be reopened and amended so as to include the additional fire resistive beam construction, on condition that the material "Spray Don" be applied to a tamped thickness of $\frac{1}{2}$ inch with a density of 14 lbs./cu. ft. and to be used in conjunction with a floor construction as previously approved under this Cal. No., on condition that the requirements of the resolution adopted October 16, 1962 and as amended at various times through November 9, 1965 under Cal. No. 435-59-SM be complied with.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

473-63-SM—Joseph Platzker for L. F. Taylor, Inc., Mt. Bethel, Pa., filed for approval of the material known as Taylor Penn Crete Cinder and Concrete Blocks and Concrete Brick for use in New York City under the provisions of C26-309.0, Administrative Building Code and the Masonry Rules of the Board.

PROPOSED USE: Load bearing concrete brick, cinder and concrete blocks used in masonry construction.

DESCRIPTION: These load bearing hollow and solid blocks and brick are made in various sizes, of two types of material, namely hollow cinder 3 x 8 x 18, 4 x 8 x 18, 6 x 8 x 18, 8 x 8 x 18, 12 x 8 x 18, 4 x 9 x 18, 6 x 9 x 18, 8 x 9 x 18; Solid Cinder 3 x 9 x 18, 4 x 9 x 18, 6 x 9 x 18, 8 x 9 x 18; Hollow Concrete 4 x 8 x 18, 6 x 8 x 18, 8 x 8 x 18, 12 x 8 x 18; Solid Concrete 4 x 8 x 18; Concrete Brick $2\frac{1}{4}$ x 4 x 8.

Type III—Hi-Early Air Entraining cement by weight is used. Other aggregates by weight.

The mix design for the cinder block is as follows:

Cinder Mix (By Volume)

Cement 575 lbs. (12.30%)
Sand 800 lbs. (17.11%)
Cinder 1,700 lbs. (36.36%)
 $\frac{1}{4}$ " Gravel 1,600 lbs. (34.23%)
5.5 Gallons water per bag of cement.

These units manufactured under this mix design include Hollow and Solid Cinder Blocks.

The mix design for the Concrete Block is as follows:

Concrete Mix (By Volume)

Cement 550 lbs. (11.58%)
Sand 2,000 lbs. (42.11%)
 $\frac{1}{4}$ " Gravel 2,200 lbs. (46.32%)
5.5 Gallons water per bag of cement.

These units manufactured under this mix design include Hollow and Solid Concrete Block and Concrete Brick.

INSPECTION AND TEST: The applicant has submitted reports of tests conducted by Jersey Testing Laboratories, Inc. These tests showed that the block and concrete brick successfully met the requirements of the Masonry Rules of the Board and C26-309.0, Administrative Building Code.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Taylor Penn Crete Cinder and Concrete Blocks and Concrete Brick for voluntary use in New York City, in the following sizes:

MINUTES

Hollow Cinder 3x8x18, 4x8x18, 6x8x18, 8x8x18, 12x8x18, 4x9x18, 6x9x18, 8x9x18; Solid Cinder 3x9x18, 4x9x18, 6x9x18, 8x9x18; Hollow Concrete 4x8x18, 6x8x18, 8x8x18, 12x8x18; Solid Concrete 4x8x18, and Concrete Brick 2 1/4 x 4 x 8, on condition that the blocks and brick be of a design mix as herein described, and the requirements of the Masonry of the Board are complied with.

893-64-SA

APPLICANT—Norge Sales Corporation, Division of Borg-Warner Corp., owner.

APPEARANCES—

For Applicant: George F. Jones.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Vice Chairman Kleinert, Commissioner Fox, Commissioner Becker and Commissioner Klein 4

Negative: 0

Absent: Chairman Foley 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads: Cal. No. 893-64-SA—Norge Sales Corporation, Division of Borg-Warner Corp., Chicago, Illinois, filed for approval of the appliance known as Norge or B-W Commercial Clothes Washers, Models AWE-5012, AWE-5013 and AWE-5014, under the provisions of the Submerged Inlet Rules of the Board.

PROPOSED USE: Coin operated automatic clothes washing machines.

DESCRIPTION: The three machines are commercial automatic washers designed to wash a maximum of 12 pound dry weight of clothes. They are designed to operate from a 115 volt, 60 current and are rated 9.0 amps. The entire cycle, which consists of fill, agitation, pump out and spin, is automatically controlled by a timing device.

The level of the fill water is controlled by a pressure switch. The potable water enters the machine through a fill system consisting of a controlled flow water valve, and anti-syphon device with an air gap of one inch and the necessary hose.

Washing is accomplished in a perforated basket, which contains clothes, by a vertical, oscillating agitator driven by a transmission. The agitator is driven at 70 oscillations per minute. A capacitor start, reversible motor powers the unit through a single belt connecting the motor, pump and center drive.

Water is removed from the machine with a single stage turbine type pump, which operates at approximately motor speed. Motor reversal is required to drain the machine.

Damp drying is accomplished by spinning the perforated basket at 620 RPM. The machines are equipped with safety spin to stop the spinning action, if the clothes door is opened. A brake is provided to stop the machine.

All three machines use the same basic construction ex-

cept in the backguard area. The individual backguards are as described below:

AWE 5012 — This model has a full backguard with an attached coin vault. The backguard contains three running lights to indicate the portion of the cycle in which the machine is operating. A toggle switch is provided in the backguard for water temperature selection. The timer is housed in the backguard, behind the coin vault. The timer is advanced to the beginning of the fill cycle by a coin slide. A light on top of the backguard is used to indicate when the machine is stopped due to an out-of-balance spin load.

AWE 5013 — This model is supplied without a backguard. A timer, water selector switch and necessary wiring are provided by Norge. They are housed in commercially available coin vaults. The timer is advanced to the beginning of the fill cycle by a coin slide. These models are for apartment house basement installation to be installed individually or in multiples not exceeding two.

AWE 5014 — This machine is provided with a coin vault but no backguard. A decorative aluminum extrusion is used in lieu of a backguard. The water selector switch and timer are housed within the coin vault. The timer is advanced to the beginning of the fill cycle by the coin slide.

INSPECTION AND TEST: All data submitted was examined by Assistant Engineer G. F. Sklenarik.

The Models AWE-5012 and AWE-5014 were approved by Underwriters' Laboratories, file E 10860.

The Model AWE-5013, although similar to the above models, was not submitted to U.L. because the timer and water selector switch are installed in a meter housing in the field by the installer rather than at the factory.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Norge or B-W Commercial Clothes Washers, Models AWE-5012 and AWE-5014 under C26-191.0.a, as meeting the requirements of Rule 2 of the Submerged Inlet Rules and as meeting the requirements of C26-1277.0.h, when connected for the individual unit, and for more than one unit, provided that the connections to the waste line shall be in accordance with the following:

Maximum No. per Battery	Waste Line Diameter
3	2"
12	3"
30	4"

Slop sink requirements:

Waste line diameter 2 1/2 inches to 4 inches, slop sink 3' x 3' x 3'. All slop sinks to have mushroom strainers having a diameter the same size as the waste line.

The foregoing table is based upon there being no specific provision for this type of equipment in C26-1291.0, wherein the fixture equivalents can be determined from the table contained therein for this equipment when connected in batteries, and in addition, the discharge pump on each individual washing machine greatly facilitates the rate of discharge to the waste line. In all cases the size of the trap and branch to the soil stack from the slop sink to be one commercial size larger than the branch line header connection in the battery units.

Each washer shall bear a label reading as follows: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 893-64-SA". All installations in batteries shall be submitted to the Department of Buildings and to the Department of Water Supply, Gas and Electricity for inspection, in order that the requirements of this approval be complied with.

The applicant may at a subsequent date file for an amendment to include the Model AWE 5013 after acceptable laboratory approval has been obtained.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

1062-64-SM—Amendment to resolution to include additional sizes of Ford Pack joint brass service couplers, tees, Kornerhorn copper tubing, and brass fitting assemblies.

The Ford Meter Box Company, Incorporated, owner, requested that the resolution adopted June 15, 1965, under Cal. No. 1062-64-SM, be reopened and amended so as to include additional fittings and couplings.

PROPOSED USE: To be used for the installation of water meters in existing water lines.

DESCRIPTION: The requested fittings, tubes and couplings are manufactured and assembled in the same manner as the presently approved $\frac{3}{8}$ " to 1" sizes. The Ford Meter Box Company now wishes approval on 1½" to 2" sizes.

INSPECTION AND TEST: A test of the assembly was conducted at the Department of Water Suppl, Gas and Electricity meter test station at Kent and Flushing Avenue, Brooklyn, New York, on February 7, 1966. The test was made and witnessed by F. X. Elder, Deputy Chief Engineer, Louis Weissman, Chief of Bureau of Water Register, James P. Finnerty, Chief Inspector, Bureau of Water Register, and William A. Nolan, Director of the Board of Standards and Appeals. The test was made on the following devices:—

1½" coupling—installed on galvanized iron pipe.

2" coupling—installed on brass pipe.

1½" coupling—installed on copper tubing.

2" coupling—installed on copper tubing

2" coupling for flanged meter connections.

Pressures were built up to 150 pounds per square inch and held at that pressure for 30 minutes. All couplings held completely tight without showing any leakage. The pressure was then increased to 300 pounds per square inch without any leakage showing.

RECOMMENDATION: On the basis of data submitted by the applicant and the test witnessed and described on this report, the Committee on Test recommends that the resolution adopted June 15, 1965, under Cal. No. 1062-64-SM, be reopened and amended so as to include the additional couplings and fittings as herein described and known as Ford pack joint brass service couplers, tees, Kornerhorn

copper tubing and brass fitting assemblies for voluntary use in New York City for the installation of water meters (1½" through 2") in existing water lines under the provisions of Articles 15, Sub-Article 3, C26-1240.0 of the Administrative Building Code. All other requirements of the resolution adopted June 15, 1965, under Cal. No. 1062-64-SM, are to be complied with.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Cal. No. 42-65-SA—Prosperity, a Division of Ametek, Inc., South Portland, Maine, filed for approval of the appliance known as Prosperity Commercial Dry Cleaning Equipment, Models PR-40, PR-55 and CO-40, under the provisions of the Rules of the Board Covering Dry Cleaning Establishments.

PROPOSED USE: Dry cleaning equipment using perchlorethylene solvent.

DESCRIPTION: The PR-40 model consists of a washer cylinder in a steel cabinet, a filter, soap tank, solvent tank, button trap, a steam heated still, water cooled condenser, and a compressed air operated control system for automatic operation.

The washer cylinder is of the open pocket, end door, horizontally mounted type. It is 36 inches in diameter and 18 inches deep with an internal volume of 10.5 cubic feet.

The loading door for the cylinder is provided with an interlock switch which prevents the opening of the loading door during the extraction period and will maintain this condition until the brake brings the cylinder to a complete stop. If the loading door is opened while the unit is in any other phase of operation, the circuit to the control switch is opened and the brake will be applied stopping the unit.

An exhaust blower operates when the loading door is opened and creates a negative pressure at the fact of the unit.

The Model PR-40 has a 200 gallon solvent storage tank. A still is provided to reclaim used solvent and is heated by steam at 30-35 psi supplied from a separate boiler. The distilled solvent is condensed in a water cooled condenser and returned to the system.

The automatic cycle operation is activated by an electric

MINUTES

motor and air operated valves. Air pressure is supplied at 75 psi from an ASME specification air compressor.

The Model PR-40 accomplishes cleaning and extracting only and an approved type drying tumbler must be used to complete the process.

The Model PR-55 is similar to the Model PR-40, but is large. The washer cylinder is 44 inches in diameter and 16 inches in depth. Its internal volume is 14 cubic feet.

The solvent still is of the steam jacketed type using 60 lb. steam pressure and provision is made to finish the distillation by opening a steam valve to permit steam to infiltrate the residue and volatilize the remaining solvent. This is condensed and the water is separated and discarded; the solvent is returned to the system.

The Model CO-40 is intended for coin operation, but since it requires a separate drying tumbler to complete the cleaning process, the Model CO-40 would violate Rule 1 of the Board's Rules Covering Coin Operated Dry Cleaning Establishments. It is similar to the Model PR-40, except for coin operation. The solvent still is available as optional equipment.

INSPECTION AND TEST: All data submitted was examined by Assistant Engineer G. F. Sklenarik.

The Model PR-40 and PR-55 are approved by Canadian Standards Association. They are rated at 29 and 39 lbs., respectively based on 2.8 lbs. per cubic foot of cylinder capacity.

RECOMMENDATION: The Committee on Test recommends the approval of the appliance known as Prosperity Commercial Dry Cleaning Equipment, Models PR-40 and PR-55, but not the Model CO-40 coin-operated, for use in New York City with perchlorethylene solvent when installed in accordance with the Rules Covering Non-Coin-Operated Dry Cleaning Establishments. Each appliance shall bear a label, permanently affixed, reading: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 42-65-SA".

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
55-65-SM—Amendment to resolution as to additional use of presently approved panels.

American Acrylic Corp., Farmingdale, New York requested that the resolution adopted October 26, 1965, under

Cal. No. 55-65-SM be reopened and amended so as to permit the approved material to be used as a plastic light diffuser.

PROPOSED USE: Plastic light diffuser.

DESCRIPTION: There has been no change in the material from that presently approved. The material FR is described as self extinguishing.

RECOMMENDATION: The Committee on Test recommends that the resolution adopted October 26, 1965 under Cal. No. 55-65-SM, be reopened and amended so as to permit the material known as Lumasite FR to be used as a plastic light diffuser under the provisions of C26-461.1 Administrative Building Code, on condition that this material shall not be installed below sprinkler heads and that all other requirements of the resolution adopted October 26, 1965 under Cal. THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
169-65-SM—Rowland Products Inc., Kensington, Conn., filed for approval of the material known as Roland Polycarbonate Sheet under the provisions of Section 101 Multiple Dwelling Law.

PROPOSED USE: Glazing in schools and multiple dwelling.

DESCRIPTION: The material is a plastic sheet ranging in thickness from 10 mils to 250 mils and weighing 0.0063 lbs. per sq. ft. mil of thickness. The sheets are made of polycarbon resin with no additives, except a masking tint is added. The sheets are either transparent or translucent.

INSPECTION AND TEST: Samples of the material were examined by Assistant Engineer J. A. Darts. The applicant also submitted a report from the Underwriters' Laboratories showing that the material is classified as "self extinguishing".

RECOMMENDATION: The Committee on Test recommends that approval of the material known as Rowland Polycarbonate Sheet in sizes as herein describe for use in New York City as a glazing material in Multiple Dwellings as permitted under Section 101.3.b, Multiple Dwelling Law and for glazing windows in schools as defined under C26-132.0 and C26-133.0, Administrative Building Code, on condition that this material shall not be used in locations where in fire resistive opening protective assembly is required, and

413-65-SM—Cleveland Container Corp., New York City, filed for approval of the material known as Clevaflex-Type 12, 3" through 12" Diameter under the provisions of C26-88.0 Administrative Building Code.

PROPOSED USE: Flexible connector between branch lines and air diffusers on air conditioning systems.

DESCRIPTION: The duct is formed from two plies of tempered aluminum alloy No. 1100 foil strip. Each strip overlaps itself and is mechanically crimped to insure air tightness. After forming the plies are permanently fused together resulting in a continuous aluminum outer and inner surface.

INSPECTION AND TEST: A sample of the duct was tested at City Testing and Research Laboratories Inc., New York City, in accordance with the requirements of C26-88.0 Administrative Building Code. The specimen successfully met the requirements of an incombustible material under that section. The complete reports are on file with and are part of the record.

RECOMMENDATION: The Committee on Test recommends the approval, for voluntary installation, in New York City, of the material known as Clevaflex-Type 12 connector as having met the requirements of C26-88.0 Administrative Building Code to be used as a connector between branch lines and diffusers on air conditioning systems and between branch ducts and air mixing units, on condition that the connector shall not pass through partitions. THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

615-65-SA—Proctor and Schwartz, Inc., Philadelphia, Penna., filed for approval of the appliance known as 3-Conveyor Non-Woven Dryer K 14883, under the provisions of C26-191.0 and Article 12, Chapter 26, Administrative Building Code.

PROPOSED USE: Appliance for drying non-woven material.

DESCRIPTION: The appliance is designed to produce synthetic bonded batts. The material used in the spraying of the batts is known as Rhoplex HA 16, which is neither inflammable nor combustible under the Tag Open Cup. The appliance consists of self-supporting aluminized steel inner and outer panels encasing a four inch thick mineral wool batt insulation.

The appliance consists basically of a gas heated dryer with conveyors and includes the air recirculation system, exhaust fans, gas heating system, temperature controls and the accessory motors, starters and drives.

The burner used to supply the heat for drying is an Maxon Burner, approved by the Board under Cal. No. 203-44-SA or Eclipse Burner approved under Cal. No. 266-55-SA which is direct fired gas burning equipment consisting of burners, feed and pilot devices and all necessary piping, and safety controls.

In operation, the batts are treated with the material Rhoplex HA-16 at the feed end of the machine, and then the heated batts pass back and forth through the machine by means of a conveyor system and the products of combustion and the moisture laden air are drawn off through the exhaust system to the outer air.

The air for combustion of the gas burner is drawn from space in which the machine is located.

The safety controls are so arranged that failure to operate normally due to any of the following conditions will automatically shut down the gas burning equipment.

Loss of power to exhaust fan motor. Loss of power to circulating fan motor. Loss of power to combustion blower motor. Loss of control circuit voltage. Low gas pressure. Low air pressure. Excessive temperature above high temperature limit switch setting. Failure of any of the electronic tubes. Loss of flame. Grounding of flame electrode.

INSPECTION AND TEST: A dryer at 348 Manida

MINUTES

Street, Bronx, New York City, was inspected by Asst. Engr. J. A. Darts. The machine was operated and various failures were caused to check the safety features and controls. All controls and safety features operated as designed. **RECOMMENDATION:** The Committee on Test recommends the approval of the appliance known as 3-Conveyor Non-Woven Dryer K 14883 for use in New York City under the provisions of C26-191.0 Administrative Building Code under the following conditions:

The solution used in conjunction with the batts shall be known as Rhoplex HA-16 which is a water base emulsion; that no inflammable or combustible solvents shall be used; that the machine shall be vented in accordance with the requirements of Article 12 Chapter 26 Administrative Building Code; that the maximum operating temperature shall not exceed 400°F. The appliance shall bear a label, permanently affixed, reading, "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 615-65-SA".

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

1258-65-SM—Hico Corp. of America, Conver Steel and Wire Division, New York City filed for approval of the material known as Perma Wall Masonry Wall Reinforcing under the provisions of C26-430.0 and C26-431.0 Administrative Building Code.

PROPOSED USE: To bond withes in hollow wall construction and to be used in lieu of headers.

DESCRIPTION: The masonry reinforcement is of the ladder type. The reinforcement is made in three different weights; standard, heavy and extra heavy.

The standard is made of 9 gauge wire in both runners and cross wires. The heavy is made of 3/16 inch wire runners and 9 gauge wire cross wires. The extra heavy is 3/16 inch wire in both the runners and cross wires. The cross wires, in all instances, are spaced 15 inches on centers. The runner rods or wires are knurled to create extra mortar bond.

INSPECTION AND TEST: Samples of the material were examined by Assistant Engineer J. A. Darts.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Perma Wall

Masonry Wall Reinforcing manufactured by Hico Corp. of America, Conver Steel and Wire Division, for use in New York City, on the following conditions: that the material shall be not dipped galvanized; that the material may be used as a tee for bonding withes in hollow walls as provided under C26-430.0 Administrative Building Code; that the tee or lock be formed with a drip section; that the material may be used in lieu of a header course and that the material is placed not more than 16 inches on centers in a vertical plane.

When used in lieu of headers, the type of construction known as "stacked coursing" shall not be used. All cartons in which the material is marketed shall be labeled "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 1258-65-SM".

PROPOSED USE: To reinforce the concrete soffits.

DESCRIPTION: The Rigid Clip is manufactured of either 12 or 10 gauge galvanized wire. The standard spacing of the clips are 12 inches on centers. The two circular loops, one inch in diameter, are designed to rest at the edge of the flanges and space the reinforcement in the center of the fireproofing. The projecting wires are bent around the flanges and hold the clips securely in place. The number of longitudinal wires is dependent on the width of the flanges; flanges 3" to 8"—1 wire; 9" to 15"—2 wires; 16" to 20"—3 wires; 21" to 25"—4 wires. Channel—1 wire.

The Expansible Clip is manufactured of the same gauge wires and is manufactured in five sizes. Style A—4 inch wide expands to 8 inches; Style B—8 inch wide expands to 12 inches; Style C 12 inch wide expands to 16 inches. Style D—16 inch wide expands to 24 inches. Channel — One size for all widths of channels. The two circular loops act in the same manner as for the rigid clip.

INSPECTION AND TEST: Samples of the clips were examined by Assistant Engineer J. A. Darts.

RECOMMENDATION: The Committee on Test recommends the approval of the materials known as Conver Reed Rigid Clip and Conver Reed Expansible Clip for voluntary use in New York City under C26-191.0, Administrative Building Code to reinforce the concrete soffit on structural steel beams, girder or columns. NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. Purchase payment by postage stamps **NOT ACCEPTABLE**.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on

Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox, Commissioner Becker and Commissioner Klein 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads: 212-65-SM—Rayonier, Inc., New York City, filed for approval of the material known as Raymix under the provisions of C26-191.0, Administrative Building Code.

PROPOSED USE: Admixture to concrete.

DESCRIPTION: The material is basically a lignin base solid. The formulation of this material is of a proprietary nature, and therefore the formula, in a sealed envelope, has been placed in the Board's safe where it may be examined at anytime, if the need arises.

INSPECTION AND TEST: The applicant has submitted a report of tests conducted by the Jersey Testing Laboratories, Inc. and Ambric Testing & Engineering Associates Inc. The tests showed that at both 7 and 28 days, the concrete using the admixture had greater strengths.

RECOMMENDATION: The Committee on Test recommends the approval of the material known as Raymix for voluntary use as an admixture for concrete under the provisions of C26-191.0, Administrative Building Code, on condition that the maximum amount of the admixture shall not exceed 4 ozs. per sack of cement. All containers in which the material is marketed shall be labeled: "Approved by the Board of Standards and Appeals for use in New York City under Cal. No. 212-65-SM".

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the Zoning Resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—add postage payment if the forms are forwarded by mail. COURT DECISIONS.

Matter of Powers vs. Foley:—At Supreme Court, Special Term, Part I. Mr. Justice Beckinella rendered the following decision:
“In this article 78 proceeding petitioner shall have judgment to the extent that respondents shall accept petitioner’s application for an extension of the period to complete construction petitioner’s building retroactive to December 15, 1964 (see CPLR 2004)
Respondents would have the court construe the time requirements of Section 11-324 of the Zoning Resolution with the same rigor as though the Section were a statute of limitations. It is more just to consider it as a rule to which CPLR 2004 is applicable. Settle the judgment on notice.” Calendar Number 4184-BZY; Premises 2279-2283 East 69th Street, Block No. 8438, Part of Lot No. 6, Borough of Brooklyn.
(N. Y. Law Journal, June 24, 1965, page 14).
The Appellate Division, Second Judicial Department by Ughetta, Acting P.J.; Christ, Brennan, Rabin and Hopkins, JJ. sustained the Board and denied the petition, as follows:
“ . . . The board is not bound to accept and act on petitioner’s application, although it may have accepted and granted applications for similar relief in other instances (see Matter of Larkin Co. v. Schwab, 242 N. Y. 330, 336). The board is not bound to continue error in its interpretation of the law governing its powers. Nor does CPLR 2004 permit an extension of time to be granted to the petitioner; it applies to extensions of time for the doing of acts in actions and proceedings and not for the doing of acts which are substantive in character and provided for under other statutes (cf. Matter of Keep v. City of Lockport, 241 App. Div. 556, aff’d 266 N.Y. 583; cf. Denise v. Welch, 242 App. Div. 34).
